## **Foreword**

Welcome to the Faculty of Business, Finance and Marketing!

The goal of international education at our faculty is to help students become responsible business professionals with the competencies to succeed in society and in the international labor market.

To reflect the international dimension our academic programs offer many modules with an international perspective; moreover, we have also taken care to provide language modules at various levels to ensure that students can take languages at their own level and further enhance these skills. We believe this is vital in helping you become global citizens able to meet the challenges of modern society, thus increasing both your employability and social awareness. These are important considerations in our university and ones we are happy to share with you.

This guide aims to outline the study programs available for our guest students. The information given in this guide will give you the information you need to make the course/module choices that best fit your study interests.

We hope that all our guest students enjoy their stay in The Netherlands and that they will thrive from the challenges and opportunities we have to offer them. We shall certainly do everything possible to make your stay with us rewarding and look forward to having you here.

# 1. Welcome to the Faculty BFM

#### **Meet the BFM Global Office**

NAME	Role
Mr Casper Verschoor	Head of Global Office & Internationalization
Ms Noor Verwoerd	Coordinator Inbound Exchange
Ms Angelique le Guillou	Partner Manager
Mr Pieter de Vos	Partner Manager
Ms Ranu Paltantewari	Internationalisation at Home
Mr Javid Jafarov	The Hague Summer School

#### **Desks and Questions**

There are several desks on campus that you can contact for questions on various topics and issues.

#### **BFM Global Office**

For exchange students, **Ms. Noor Verwoerd - Coordinator Inbound Exchange** is the first point of contact during your study here. She can answer questions related to course selection, course registration, timetables, etc. She will also sign Learning Agreements and finalize Transcripts.

E-mail: BFM-inboundexchange@hhs.nl Phone: +31 (0)6 43 56 83 67

We are also on Instagram! Follow **BFM Worldwide Exchange** by scanning the QR code:

## Front Office Faculty BFM

The Faculty Business, Finance & Marketing's Front Office can redirect you to the right person or department within the faculty.

Telephone +31 70 445 7958

E-mail bfm@hhs.nl Location: ST 2.55

#### **International Office THUAS**

For any questions about housing, your general application at THUAS, residence permits and visas, health insurance, medical care, and registering at the municipality.

Telephone: +31 70 445 8505 E-mail: exchange@hhs.nl

Location: OV1.02

#### **IT Front Office**

For IT-related questions and issues, log-in details, and campus card.

Telephone: +31 70 445 7777 E-mail: Frontoffice@hhs.nl

Location: OV1.67

## **BFM Exam Office**

For written exam related questions E-mail: bfm-examoffice@hhs.nl

Location: OV2.57

# 2. Facilities

#### **Library and Study Plaza**

The library has a large collection of books, nearly 900 magazines, Dutch and foreign newspapers, and a large collection of graduation essays. Because of its digital catalogue and excellent electronic sources of information, the library provides excellent facilities to students and staff. It is open to students registered at THUAS and to members of staff. The Library is located on the first floor (entrance/exit, self-service unit for borrowing and returning items, Study Plaza) and ground floor (books, periodicals). Most library services are free of charge.

Most of the books, graduation essays and videotapes are available for borrowing. Magazines are not, but there are facilities for copying magazine articles. There is a limit to the number of items that can be borrowed.

There is also a digital library (for the most part accessible any time, from any computer, once you are logged in as a student) which includes (international) databases, E-journals, standards database, E-books, THUAS theses and publications in digital form, information about copyright regulations and tools available for managing references. If you have any questions, you can visit the library and ask a staff member or contact the library via email: <a href="mailto:bibliotheek@hhs.nl">bibliotheek@hhs.nl</a>.

#### **Student Counselors**

THUAS has a counselling system in place to help students facing problems that may affect their study results. Our Exchange students are also encouraged to speak to our faculty Student Counselors and/or the Coordinator Inbound Exchange in order to alleviate their problems.

The Student Counselors may be approached when students have more personal problems affecting their studies. They need to be contacted if you have any special needs during your exchange at our faculty (extra time for exams, extra aids etc.). They can also help students with any appeals against decisions judged to be unfair or incorrect.

They are there to listen to students and help them as best they can. Any conversations with the student counselors or the faculty staff are strictly confidential. Students may be referred to expert agencies outside the university if needed.

## **Campus Card**

We use an electronic purse system at THUAS to buy food and drinks and make copies on the copy machines. It is not possible to pay in cash inside the university. During the mandatory Introduction Days, we will assist you to collect a Campus card.

To load credit on this card, you will need to have a PayPal account or a Dutch bank account (with a Dutch bank account you can charge your card using Ideal or the THUAS building machines). It is not possible to charge the Campus Card with foreign bank cards, so make sure you get a credit card or PayPal account so you can use it upon arrival at THUAS. Alternatively,

food and drinks can be bought at THUAS with a Dutch bank card, which you will receive upon opening a Dutch bank account.

#### Canteen

Food and beverages may be obtained from the central restaurant, a smaller restaurant called The Bridge, from the West 75 cafe and from vending machines. In all cases payment is through chip cards. The central food court has the largest selection of items, also serving vegetarian and halal products. It is open during term-time from 8am to 8pm (5 pm on Fridays). During the holiday periods the opening hours may vary.

Moreover, the university has microwaves that can be used for heating up food, multiple coffee corners on various floors, and a restaurant called the "West 75". Please note that students can only pay by Campus Card or a Dutch (European) Maestro bank card. The university does not accept cash or credit cards.

There is also a small grocery store outside the main building called "Albert Heijn To Go"\*, which sells a selection of meals and snacks and drinks. There are also various vending machines with drinks and snacks on multiple floors of the university.

#### **Medical Care**

There are numerous General Practitioners around the university and in the areas of student housing. More information will be provided by our International Office upon arrival.

In case of illness, you should contact a General Practitioner ("huisarts") first. They are your main link to any specialist or hospital. Most GP's speak English, but it is important to check if they participate in your health care system.

Make sure to bring proof of your health insurance to the appointment, otherwise you'll have to pay for the consult directly after you've visited the doctor.

A regular consult costs around € 30 - € 50. Blood tests, psychological support a.o. cost a lot more. Do not forget to ask for a receipt, as after your visit you can declare these costs at your insurance company.

In the Netherlands, you will need a prescription for most medication. With a prescription you can go to a pharmacy ("apotheek") to collect your medication. You pay for it when it's ready, and if you have medical insurance, you can usually claim the expenses from the insurer. Certain medicines are available over the counter, either in a pharmacy or at a chemist (drogist). Pharmacies and chemists usually have the same opening hours as shops. There is always a pharmacy open, even on weekends. The telephone directory of The Hague and surroundings contains an extensive list of pharmacies in The Hague.

During the mandatory Introduction Days, more information and contact numbers will be provided.

# 3. Information on the Academic Programme

As an exchange student at the Faculty of Business, Finance and Marketing you can choose modules from three of our bachelor programmes that offer courses to exchange students:

- International Business (IB)
- International Financial Management & Control (IFMC)
- Marketing Management (CE)

In this course guide you will find the information per programme. Most modules are offered by our International Business programme (IB). The programme International Financial Management & Control (IFMC) offers minors (15 or 30 ECTS courses). You can choose modules from International Business (IB) and combine these with a 15-ECTS minor from IFMC within a semester. Please note that next to a minor from IFMC you cannot follow other modules from IB at the same time, only in sequence. We recommend a maximum of 30 ECTS per semester.

The Marketing Management (CE) programme offers a fixed set of modules of 30 ECTS in the Spring semester only. You cannot choose to follow separate modules from our marketing programme. Furthermore, if you choose to study at the Marketing Management program you cannot choose any modules from the other study programs.

#### **Attendance**

Students are expected to be on time for classes. If a student comes to class late, the lecturer concerned may refuse him/her entry.

#### **How students contact lecturers**

If students wish to contact staff outside class hours or want to hand in an essay, paper or other assignment, they must follow the following procedures:

- Handing in assignments (including essays and papers) is done via e-mail or via The
  Digital Learning environment "BrightSpace". The lecturer will inform you which medium
  to use.
- Members of staff can be asked short questions through e-mail. Students can normally
  expect to get an answer to e-mail questions within 3 working days. A quicker solution
  can be to use the chat in Teams.

#### **How staff contact students**

If a member of staff wishes to contact a student, the following methods are used:

- Through e-mail. All THUAS students have their own THUAS e-mail address. The Digital Learning environment "Brightspace" is also commonly used.
- Through study-related announcements published on the university portal (http://intranet.hhs.nl/).
- If necessary, for example reasons of confidentiality, programs of the faculty may try to contact a student through other methods, for instance by phone or by post. For that reason it is absolutely necessary that the faculty has up-to-date information about a student's address and phone number. Should any changes occur during the academic year, please inform us via email at BFM-inboundexchange@hhs.nl

#### Timetables / schedule / courses

There are two semesters (four blocks) in an academic year. The timetables will differ from block to block. These are numbered sequentially: Block 1 and 2 belonging to the first (Fall) semester, and Block 3 and 4 belonging to the second (Spring) semester. Please note, that the IFMC Programme uses the word *term* instead of block.

Prior to your arrival, the BFM "Course Choice Form" will be sent to you by email. Here, you give your preference for the modules you would like to take at the faculty BFM. The final enrollment of modules will take place during the introduction week.

It could be the case that some modules of your choice are full upon your arrival; in such cases you will be able to select other available modules. Your learning agreement will be finalized after the enrollment for courses during the introduction week.

#### Class hours

Classes are allotted by slots. Some classes last 45 minutes, and others 90 minutes. The slots are as follows:

```
1. 08.45 am - 09.30 am
2. 09.30 am - 10.15 am
3. 10.30 am - 11.15 am
4. 11.15 am - 12.00 pm
5. 12.15 pm - 13.00 pm
6. 13.00 pm - 13.45 pm
7. 13.45 pm - 14.30 pm
8. 14.45 pm - 15.30 pm
9. 15.30 pm - 16.15 pm
10. 16.30 pm - 17.15 pm
```

11. 17.15 pm - 18.00 pm

In weeks with fewer than five working days the timetable is adjusted so that as many classes as possible can take place.

#### **BFM Introduction week**

The academic calendar runs from 2 September, 2024 to 18 July, 2025. Both the Fall and the Spring Exchange Semester start with a (mandatory) Introduction Week.

#### **Fall semester Introduction**

The mandatory introduction week for IB exchange students will take place from Monday 2 September 2024 to Friday 6 September 2024. Classes for IB start directly after the Introduction in the week of 9 September 2024.

As classes for IFMC start on Monday 2 September 2024, there will be a one-day Introduction on Thursday 29 August 2024 for IFMC students, and a Welcome Social Event for all BFM exchange students on 3 September 2024.

#### **Spring semester Introduction**

The spring semester of the 2024-2025 academic year runs from 10 February 2024 until 11 July 2025. The mandatory introduction week for all exchange students will take place from Tuesday 4 February to Thursday 6 February.

Attendance during the introduction week is mandatory. Exact times of this event will be announced in due time.

#### **Documentation**

Official Erasmus+ / Exchange documentation for exchange students, such as Learning Agreements (Before- and During Mobility), and Certificates of Stay can be sent via Erasmus Without Papers portals or as PDF documents via email to BFM-inboundexchange@hhs.nl for processing.

Signage on behalf of THUAS on all documentation will be done by:

## Noor (E.J.) Verwoerd Coordinator Inbound Exchange

The Hague University of Applied Sciences | Faculty of Business, Finance & Marketing Johanna Westerdijkplein 75 | 2521 EN The Hague | The Netherlands Telephone: +31 643568367| bfm-inboundexchange@hhs.nl|

# 4. Student Activities

## **Campus Life & Sports at THUAS**

THUAS organizes numerous sporting activities, such as volleyball, football/soccer, basketball, badminton, yoga, Pilates, Zumba, boxing, capoeira, body shape etc. and students pay a small contribution to participate. The THUAS gym is accessible to students with a sport and fitness card, which can be purchased for a reduced amount for a semester or an entire academic year. For further information, please consult their webpage.

The main campus is also home to various sports clubs (rowing, korfball, lacrosse, rugby, tennis, football, volleyball, hockey, basketball, athletics etc.) and organises events and parties for international students from time to time. More information is available via email at <a href="mailto:campus@hhs.nl">campus@hhs.nl</a>.

#### **Student Associations**

The **FOCUS** Study Association is "focused" on making an impact within the trIBe, the International Business community, through networking events, academic growth, and friendship building. Our association has five committees, Academic Development, Introduction Days, Events, Merchandise and Funding and Excursions. Academic Development works to organize events, guest lectures and company visits to further education outside of the classroom. Introduction Days organizes fun activities for students coming to the Hague University of Applied Sciences for the first time and is a stepping tool to starting connections and friendships with other first time students in IB. The events committee organizes social events throughout the entire year promoting camaraderie among students. The merchandise and funding committee puts their efforts towards creating trIBe and FOCUS merch and sponsorships. And lastly but certainly not least, the Excursions committee organizes amazing opportunities for IB students to travel to different locations during breaks with other IB and FOCUS students. FOCUS supports IB students to further their involvement from just school to really being a part of the trlBe. We hope this gives you more insight to what FOCUS does and stands for and for more information, please follow us on our Instagram, @focus studvassociation:

https://instagram.com/focus studyassociation?igshid=YmMyMTA2M2Y=

**FESA** is a study association founded in November 2019 by **Finance & Control** students. The study association was already open for the FC program and also the IFMC program. Accountancy has now also been added from this school year.

A lot is possible at the study association and we hope to be able to offer a lot of support to the students in the future. If you think it would be fun to join the study association, sign up via the site! Would you also like to do something more than just be a member, you can also join one of the committees and show what you can do or develop yourself more.

Follow us on our social media for updates on what's going on and fun upcoming events.

https://www.instagram.com/fesathehague/

For more information about FESA, check out our website or socials or send an email to: bestuur@fesathehauge.com.

The **CE/Marketing** Exchange students will join an "**International Classroom**" during their exchange at THUAS. In this classroom, regular students are directly paired with exchange students. Therefore, intercultural interactions will naturally grow. During the semester, several extra-curricular activities will also be organized for all participants of the International Classroom.

# 5. International Business (IB)

The International Business program awards a Bachelor's degree. The program is offered over the course of 4 years and is fully taught in English. This chapter will give you an overview of the course offer from the International Business program.

The curriculum offered by the International Business program to International Exchange students is divided into 2 broad sections, namely Core and Expanded curriculum.

#### Core curriculum

Our core curriculum is categorized according to 4 business functions:

- People and Organization (P&O) also known as Human Resources Management (HRM)
- Finance
- Marketing
- Supply Chain and Operations

Additionally, we offer modules that address the following competencies:

- Ways of Thinking
- Ways of Working
- · Living in the World

Within each function or competency we offer modules at different knowledge levels, as follows:

- Foundation (mostly year 1 modules)
- Intermediate to advanced (mostly year 2 or year 3 modules)

#### **Expanded curriculum**

Furthering our offer, we make available Specialized topics modules, which we commonly name "Minors":

- Asia (Spring semester)
- Sustainability (Fall and Spring semester)
- Purposeful Marketing (Fall and Spring semester)
- Entrepreneurship (Spring semester)
- Business Analytics (Spring semester)
- Business NGO Collaborations (Spring semester)

### Please note:

- Minors can only be selected as the full 15-ECTS course; no sub-parts of the Minor can be selected as individual courses.
- Per Minor, spots available for exchange students are very limited. If the Minor of choice is full upon enrollment, you will be able to select other courses.
- We also offer a set of language and culture modules and a selection of electives.
- Our aim is to provide you with a comprehensive overview of the modules that are made available to exchange students.
- We recommend a maximum of 30 ECTS per semester, as to manage work load and time tables.

#### **Semesters**

Please note that our semester is divided into 2 blocks and that some modules that you can register for are offered only in block 1 or 2. As stated in the Course overview below, courses can be taking place in the first and / or second block of the semester.

#### Semester 1

- Semester 1 starts with a mandatory introduction week on the 2<sup>nd</sup> of September 2024.
- Semester 1/ block 1 runs from 9 September 2024 to 25 October 2024.
- Exams block 1 take place in the week of 4 November 2024. Resit exams take place in the week of 6 January 2025.
- Semester 1/ block 2 runs from 11 November 2024 to 17 January 2025.
- Exams block 2 take place in the week of 20 January 2025. (Apart from the module Management of Information II; this exam takes place in the week of 16 December 2024).
- Modules that run through the entire semester have their exams in the week of 20 January 2025.
- Semester 1 ends on the 24th of January 2025.

#### Semester 2

- Semester 2 starts with a mandatory introduction week on the 3<sup>rd</sup> of February 2025.
- Semester 2/ block 3 runs from 10 February 2025 to 4 April 2025.
- Exams block 3 take place in the week of 7 April. Resit exams take place in the week of 30 June 2025.
- 2nd semester/ block 4 runs from 14 April 2025 to 6 June 2025.
- Exams block 4 take place in the week of 16 June 2025. Resit exams take place in the week of 14 July 2025. The semester ends on 18 July 2025.
- Modules that run through the entire semester have their exams in the week of 16 June 2025.

#### Exams / tests

At the end of each block there is an exam/test period (TP1, TP2, TP3 and TP4 noted as in the Academic Calendar). These periods last one week. You are allowed one resit for exams if you have not passed them. There are specific dates where students can re-take exams/test (noted as RP1, RP2, RP3 and RP4 in the Academic Calendar).

For students joining the IB Exchange programme in Semester 1 please be aware of the following:

The exams for the second block of Semester 1, as well as the resit exams for the first block of Semester 1, take place <u>on Campus</u> in January after the Christmas holidays.

The resit exams for the second block of Semester 1 can be taken <u>online</u> in the week of 28 April 2025.

Each exam you take can be reviewed with your respective lecturer during review sessions, which are scheduled at specific dates during the semester.

During the first weeks of your Exchange, a special mandatory presentation will be organized for you by our Exam Office and Exam Board, to inform you on the exam policy at THUAS.

# 6. International Business - Course overview

#### **IB Year 1 Modules**

ECTS	OSIRIS Code	Course/Module	Semester	Block
3	IB-P116-22	Business Mathematics	Fall	1
3	IB-P101-18	Thinking in Action I: Introduction to Critical Thinking	Fall	2

# 7. International Financial Management & Control (IFMC)

International Financial Management & Control (IFMC) bachelor programme prepares you for your future financial career. You learn the basics in Year One and you will take a deep dive into finances and controlling in Year Two. Year Three covers risk management and controlling courses as well as a 15-week practical orientation internship. Year Four has minors in semester one and a graduation (research) project in semester two.

IFMC is well-known in the business because of its practical courses, hands-on competencies and 21st century skills. This is the main reason why IFMC students obtain excellent job opportunities only within a couple of months after their graduation. Today, IFMC students are specializing in the fields of blockchain technologies, cryptocurrencies, data sciences, digital trading, and financial investments. These are the specialization minors that IFMC offers to IFMC students and to students from other universities worldwide.

#### **Schedule of IFMC minors**

The IFMC semesters are divided into two blocks of each 10 lesson weeks. Classes are in week 1 to and including week 6. Exams and assignments hand-ins are in week 7. Week 8 and 9 are project weeks where you will work on a self-chosen challenge in group form. At the end of week 9 you will hand in an advisory report and present it to your class. Rework activities in lesson week 10. You can find the dates of each semester and block in the table below.

Semester 1	Introduction day	29 August 2024
	Block A	2 Sept 2024 - 17 Nov 2024
	Block B	18 Nov 2024 - 9 Feb 2025
Semester 2	Introduction week	3 – 7 Feb 2025
	Block C	10 Feb 2025 - 26 Apr 2025
	Block D	29 Apr 2025 – 4 Jul 2025

#### **REMINDER**

You can choose modules from International Business (IB) and combine these with a 15-ECTS minor from IFMC within a semester. Please note that next to a minor from IFMC you cannot follow other modules from IB at the same time in the same block, only in sequence.

#### **Exams**

There is an exam period at the end of each block. This exam periods last one week. Please be aware that courses that run the whole semester (two blocks) have two exam periods. All exams have a resit exam for students who did not pass the first exam. You can review your exam results with your lecturer. These review dates will be announced at the start of the course. Some courses have an individual or group paper instead of an exam. In this case, the presentation dates will be announced at the start of the course.

# 8. International Financial Management & Control - Course Overview

ECTS	Osiris Code	IFMC Inbound Exchange minors	Semester	Block /Term
15	BFM-HMVT24- BAI15	#HYF Blockchain, AI & Quantum (15 ECTS)	Fall & Spring	A, B or C
30	BFM-HMVT24- BAI30	#HYF Blockchain,AI & Quantum (30 ECTS))	Fall & Spring	A & B C & D
15	BFM-HMVT20- TRADE	#HYF Trading Digital & Financial Assets (TDFA)	Fall & Spring	A, B or C
30	BFM-HMVT21- FIT	#HYF FinTech: Investing & Trading (FIT)	Fall & Spring	A & B C & D

Note: The Block Chain Minor has two versions, i.e. a 15 ECTS and a 30 ECTS.

#### General notes:

- 1. The 15 ECTS minor starts in blocks A, B and C and has a duration of one block.
- 2. The 30 ECTS minor start at block A and in block C and have a duration of 2 blocks. Students can choose to take it in A & B or C & D.
- 3. The Trading & Investing Minors will mostly consist of online education. The Blockchain Minors will have both physical and online streamed classes.

# 9. Marketing Management (CE)

Marketing Management (CE) prepares you as marketer for the future. You will engage with current topics and trends in both online- and offline marketing management. You will learn about marketing form an entrepreneurial, ethical as well as a multicultural perspective with a practical approach.

The Marketing Management program awards a Bachelor's degree. Marketing Management is a Dutch taught program, with one full semester in English. This chapter will deal with the information, rules and regulations of being part of the exchange program. The inbound exchange students will be part of a so-called International Classroom where the students are mixed with Dutch speaking students.

The first part of the exchange semester in marketing evolves around export marketing whereby you will elaborate an export marketing plan for a real-life company. The course is supported with theories regarding export marketing as well as intercultural management and financial management. The results will need to be presented to the company as part of the assessment. The second part of the semester is about strategic marketing using theories and current business cases. For personal development electives are offered in both block 3 and 4 in order to complete 30 ECTS.

#### Schedule/Calendar

Only exchange students who come in spring to our faculty can take part in courses of the program Marketing Management (CE). Classes for the Marketing Management program run in the spring semester of the 2024-2025. The semester starts in the week of February 10th 2025 and runs until July 4th, 2025.

#### **Semesters**

Please note that our spring semester is divided into 2 blocks:

- Semester 2 / Block 3 runs from February 10<sup>th</sup> 2025 onwards.
- Exams Block 3 in the week of 14nd April. Resit exam week 26th May 2025.
- 2<sup>nd</sup> semester/ Block 4 for runs from 28 April onwards.
- Exams Block 4: in the week of June 16th. Resit exam week Block 4 week of June 30th 2025
- Semester ends on Friday 4<sup>th</sup>July.
- Some other modules (like Business Communication or special offerings) run through the whole semester.

#### Exams / tests

At the end of each term there is an exam/test week. Modules that run the whole semester have 2 test weeks. You are allowed to re-take exams/tests if you have failed them. These are called resits. There are specific dates where students can re-take exams/test. Each exam you take can be reviewed with your respective lecturer during review sessions, which are scheduled at specific dates during the semester.

During the first weeks of your Exchange, a special mandatory presentation will be organized for you by our Exam Office and Exam Board, to inform you on the exam policy at THUAS.

#### Important information:

Please be aware, that if you would like to study at our Marketing Management program you follow a fixed set of modules in marketing of 30 ECTS. You cannot choose to follow separate modules from our marketing program. If you choose the marketing program you <u>cannot</u> choose any modules from the other study programs i.e. at International Business.

# 10. Marketing Management - Course Overview

The first part of the exchange semester at the Marketing Management program evolves around export marketing whereby you will elaborate an export marketing plan for a real-life company. The course is supported with theories regarding export marketing as well as intercultural management and financial management. The results will need to be presented to the company as part of the assessment. The second part of the semester is about strategic marketing using theories and current business cases. For personal development electives are offered in both block 3 and 4 in order to complete 30 ECTS.

Programme Year	Year 1 FYP / TYP
Semester / Block	Semester 1 / Blocks 1 & 2
Weeks	14
Teaching Method	Lectures, Workshops
Coordinator	Ms. Aragon
Lecturer(s)	
Course content/outline	Marketing and Sales are fundamental functions for big and small organizations, for business and for individual success. In these dynamic and exciting fields, there are challenges posed by globalization, digital innovation and everchanging markets, cluttered with brands under constant reinvention.  General public often confuses Marketing with advertising and persuading people to buy products and services that they don't need. However, what lies at the heart of Marketing is the understanding of consumers and organizational customer journeys, and the need to generate genuine customer value for them. In this introductory course all basic principles of marketing will be covered:  - identify customer needs and motivations, - satisfy those needs in a distinctive way with the right products and/or services, - ensure customers access through the best distribution channels, - use promotional activities in the right place at the right moment, enhancing their experience, and - determine the price to boost the firm's profitability while also maintaining customer satisfaction and loyalty.  In a similar way, Sales is commonly stereotyped with the image of a pushy retail
	salesclerk, or a glad-handing "used-car salesman". Far from that, sales professionals do not succeed by taking advantage of customers, but by listening to their needs and helping to forge solutions. In this introductory course students will learn the importance of sales function to build powerful relationships with customers (especially in the B2B context). Students will also understand Sales role related to Marketing, not only as a promotional mix tool, but as a key strategic partner in direct contact with the customer.  In addition, this course also integrates the impact of digital developments in Marketing & Sales, and the call to integrate purposeful marketing practices, aligned with corporate ethics and social responsibility.  It's strongly advised for all students to participate in all lectures and workshops throughout the 16 weeks to be successful in this 6 ECTS module that provides the foundation for the Integrated Project 2 (Semester 2) and all other IB Marketing & Sales courses (Year 2 and beyond).

Course content/outline	communic structure written so contrast pemails, de synthesiz During thi applicatio useful in f	This course will equip students with the essential skills needed for professional communication in a business setting by covering two main areas: (1) format and structure of short professional emails, and (2) synthesizing information from written sources on current international business issues into comparison and contrast paragraphs. Students will learn to craft well-structured and professional emails, develop their skills in selecting, paraphrasing, summarizing, and synthesizing written information, and learn how to reference sources properly. During this course students will improve their theoretical knowledge and practical application of Academic & Business Communication Skills. These skills will be useful in future courses and will help them effectively communicate in the business world.

## **Module Description: Advanced Marketing & Sales (AM&S)**

<b>Module Desc</b>	ription: Advanced Marketing & Sales
Credits	6 ECTS
Course Code	IB-S226-24
Entry requirements	
Programme Year	Year 2 FYP / TYP
Semester / Block	Semester 1 / Block 1 & 2 or Semester 2 / Block 3 & 4
Weeks	14
Teaching Method	Lecture and workshop
Coordinator	Ms Sara Palacios
Lecturer(s)	
Course content/outline	Building on the knowledge and competences students gained in Year-1 Marketing & Sales Fundamentals, the Advanced Marketing & Sales course provides participants with the knowledge and management skills to accomplish successful marketing decisions in the international business landscape.  It offers the future International Business professionals the necessary knowledge on how Marketing and Sales works strategically in an international environment, including the integration of contemporary digital development, to exceed competition in customer value creation and delivery.  This course has been designed to encourage students self-learning, activate participation and develop marketing analytical skills. Along the course, students will work on several marketing challenges (problem-solving on business cases) which will include:  Problem analysis (support with videos, articles, references in Brightspace)  Research (finding data, reports, reference other business cases, Euromonitor training)  Creation (ideation and solution proposal)  Pitch (class presentation, including formative assessment and peer feedback)  Considering the practical approach of this course, it's strongly advised for students to participate all lectures and workshops in order to be successful in this module. Due to the wide range of subjects, the lecture materials will be tailor-made specifically by various lecturers. They will consist of different learning activities to ensure knowledge and skills are practiced. Therefore, class participation is critical to reach the learning goals.

#### IB Year 2 L&C Business Communication I & II

#### Module Description: L&C I Chinese Business Communication - Absolute beginners

	ription: L&C I Chinese Business on – Absolute beginners
Credits	3 ECTS
Course Code	IB-K005-24
Entry requirements	
Programme Year	Year 2 FYP
Semester / Block	Semester 1 / Block 1 & 2
Weeks	14
Teaching Method	Workshop
Coordinator	Ms. Juul Wolters & Ms. Evelyn Armstrong-Murris
Lecturer(s)	Ms. Yabo Qian
Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  The module has a communicative approach as the main goal is to acquire the ability to communicate in the target language: Chinese. All language skills will be included: reading, listening, speaking, writing, and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.  The Absolute beginner student starts learning Chinese at this level, which is the most basic level of language use. Students at this level can handle very simple and routine tasks that deal with everyday situations. They are able to talk about themselves and their environment. They can use Chinese to understand dates/times/numbers, meet people, ask and respond to simple questions in their work/ business and direct surroundings.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements:  The Common European Framework (CEFR) provides a way to determine your linguistic ability in any (European) language.  You can register for this course only if you have:  • no knowledge of the language to be studied

 been exposed to the language in a passive way or only studied it for a duration of 1 year, provided that you studied the language not earlier than 3 years ago, making you a "false beginner".

Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  The module has a communicative approach as the main goal is to acquire the ability to communicate in the target language: French. All language skills will be included: reading, listening, speaking, writing, and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.  At the Elementary level, students will be able to perform simple interactions: they will be able to talk about themselves and their immediate social and business/ work related environment. They can handle simple and routine tasks and deal with everyday situations. They have a competence to express their simple needs; they can use French to understand dates/times/numbers, meet people, ask for places/directions, place orders.						
	Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements: The Common European Framework (CEFR) provides a way to determine your						
	Inguistic ability in any European language.  You can register for this course if you can: - understand and use sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal, work related and family information, such as nationality, family members, etc.).						

- introduce yourself to others and can ask and answer questions about personal details such as where you live, people you know, things you have, etc.
  - interact in a simple way in a conversation.
  - make very basic phrases in the present tense.

At the end of the course, you will reach the level A1.2

Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  The module has a communicative approach as the main goal is to acquire the ability to communicate in the target language: German. All language skills will be included: reading, listening, speaking, writing, and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.  The Absolute Beginner student starts learning German at this level, which is the most basic level of language use. Students at this level can handle very simple and routine tasks that deal with everyday situations. They are able to talk about themselves and their environment. They can use German to understand dates/times/numbers, meet people, ask and respond to simple questions in their work/ business and direct surroundings.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements:  The Common European Framework (CEFR) provides a way to determine your linguistic ability in any European language.					
	understand and use sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal, work related and family information, such as nationality, family members, etc.).					

- introduce yourself to others and can ask and answer questions about personal details such as where you live, people you know, things you have, etc.
- interact in a simple way in a conversation.
- make very basic phrases in the present tense.

At the end of the course, you will reach the level A1.2

All language skills will be included: reading, listening, speaking, writing and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.						
	At the Elementary level, students will be able to perform simple interactions: they will be able to talk about themselves and their immediate social and business/ work related environment. They can handle simple and routine tasks and deal with everyday situations. They have a competence to express their simple needs; they can use Chinese to understand dates/times/numbers, meet people, ask for places/directions, place orders.						
	Students must follow the same language in both modules, Language & Culture Business Communication I and II.						
	Entry requirements: The Common European Framework (CEFR) provides a way to determine your linguistic ability in any (European) language.						
	You can register for this course if you can:  • understand and use sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal, work related and family information, such as nationality, family members, etc.).						

- introduce yourself to others and can ask and answer questions about personal details such as where you live, people you know, things you have, etc.
- interact in a simple way in a conversation.
- make very basic phrases in the present tense.

At the end of the course, you will reach level A1.2.

Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  The module has a communicative approach as the main goal is to acquire the ability to communicate in the target language: French. All language skills will be included: reading, listening, speaking, writing, and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.  At the Elementary level, students will be able to perform simple interactions: they will be able to talk about themselves and their immediate social and business/ work related environment. They can handle simple and routine tasks and deal with everyday situations. They have a competence to express their simple needs; they can use French to understand dates/times/numbers, meet people, ask for places/directions, place orders.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements:  The Common European Framework (CEFR) provides a way to determine your linguistic ability in any European language.  • You can register for this course if you can:  - understand and use sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal, work related and family information, such as nationality, family members, etc.).  - introduce yourself to others and can ask and answer questions about personal details such as where you live, people you know, things you have, etc.  - interact in a simple way in a conversation.

	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  At the pre-intermediate level, students can talk about social and work situations. Even if they make some mistakes, students can start and maintain a simple conversation in French. They have command of the language on specific subjects, routine, and simple tasks. They can understand and convey messages in French, respond to simple and direct information, have simple face-to-face conversations, and talk about activities they like or dislike. They can attend to simple needs using their knowledge of French; shopping, planning a meeting, meeting colleagues, or making a restaurant or hotel reservation etc. They can also use the most common forms of politeness and exchange to express themselves on simple daily life and business topics.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements:  The Common European Framework (CEFR) provides a way to determine your linguistic ability in any European language.  • You can register for this course if you can:  - understand and use sentences and frequently used expressions related to areas of most immediate relevance.  - describe in simple terms aspects of your background, immediate environment and matters in areas of immediate need.

## Module Description: L&C II Japanese Business Communication - Elementary

	ription: L&C II Japanese Business on - Elementary
Credits	3 ECTS
Course Code	IB-K104-24
Entry requirements	
Programme Year	Year 2 FYP
Semester / Block	Semester 2 / Block 3 & 4
Weeks	14
Teaching Method	Workshop
Coordinator	Ms. Juul Wolters & Ms. Evelyn Armstrong-Murris
Lecturer(s)	Ms. Kyoko Khosla
Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  The module has a communicative approach as the main goal is to acquire the ability to communicate in the target language: Japanese. All language skills will be included: reading, listening, speaking, writing and interacting. Students will be required to actively take part in class and will be encouraged to use the target language as much as possible.  At the Elementary level, students will be able to perform simple interactions: they will be able to talk about themselves and their immediate social and business/ work related environment. They can handle simple and routine tasks and deal with everyday situations. They have a competence to express their simple needs; they can use Japanese to understand dates/times/numbers, meet people, ask for places/directions, place orders.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements:  The Common European Framework (CEFR) provides a way to determine your linguistic ability in any (European) language.

- understand and use sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal, work related and family information, such as nationality, family members, etc.).
- introduce yourself to others and can ask and answer questions about personal details such as where you live, people you know, things you have, etc.
- interact in a simple way in a conversation.
- make very basic phrases in the present tense.

At the end of the course you will reach the level A1.2

Course content/outline	The Language & Culture Business Communication modules offer foreign language courses to prepare our students to use a certain language during their Study Abroad semester, during their internship and/or in a future work situation.  Students will study the language in two ways: they will learn how to apply conversation strategies and how to perform in different (business) environments, but they will also get acquainted with the target culture and its differences.  At the pre-intermediate level, students can talk about social and work situations. Even if they make some mistakes, students can start and maintain a simple conversation in Spanish. They have command of the language on specific subjects, routine, and simple tasks. They can understand and convey messages in Spanish, respond to simple and direct information, have simple face-to-face conversations, and talk about activities they like or dislike. They can attend to simple needs using their knowledge of Spanish; shopping, planning a meeting, meeting colleagues, or making a restaurant or hotel reservation etc. They can also use the most common forms of politeness and exchange to express themselves on simple daily life and business topics.  Students must follow the same language in both modules, Language & Culture Business Communication I and II.  Entry requirements: The Common European Framework (CEFR) provides a way to determine your linguistic ability in any European language.
	<ul> <li>You can register for this course if you can:</li> <li>understand and use sentences and frequently used expressions related to areas of most immediate relevance.</li> </ul>

- describe in simple terms aspects of your background, immediate environment and matters in areas of immediate need.
- make basic phrases in the perfect tense and be able to recognize the imperfect tense.

At the end of the course, you will reach the level A2.1

Course content/outline	essential communication decision information reports and All this in use it in essential Within the Busines	In this module students will learn the essentials of Business Intelligence (BI). An essential competence of all managers is the ability to make decisions and to communicate these decisions throughout the organization. In order to take the right decision, a manager needs to have the right information at the right time. This information is generated and processed within the company (from data, transactions to eports and analysis) and from the external environment that the company operates in all this information needs to be gathered together and processed so a manager can use it in their decision-making process. Business Intelligence dashboards form an essential part of the decision-making process for all managers.  Within this module the student will work with tabular models and design and create a Business Intelligence dashboard based on a set of big data and company needs/questions.

#### **IB Electives**

# **Module Description: Current Business and Economic Trends (CBET)**

Module Desc (CBET) Elect	cription: Current Business and Economic Trends tive
Credits	з естѕ
Course Code	IBMS-S403-16 (3 ECTS)
Entry requirements	
Programme Year	
Semester / Block	Semester 1 / block 2 or Semester 2 / block 4
Weeks	7
Teaching Method	Lecture, workshop
Coördinators	Mr. R.W.H. van der Linden; Ms. Arce Salazar;
Lecturer(s)	Mr. P. Steenwijk; Mr. G. Robbani
Course content/outline	The course focuses on the link between business and economics. After a general review of the fundamentals of economic theory, the students focus on current topics and link it to a major part of economics and its link to businesses. Important topics that are discussed are the foundations of macro-economics and its shortcomings (partly described in the <i>Doughnuts</i> economics); environmental and government policies towards businesses; the future of work and robotics, the labor market and the shared economy; the theoretical framework of financial markets and monetary theory; trends in digital banking & finance; the role of Bitcoin, crypto currencies, Big Data and AI on doing business in a digital age; international trade theories; preferential trading arrangements (e.g. EU); US-China-trade and techwar and the role of China's Belt and Road Initiative. The theory and current practical application of major macro and micro-economic issues (price setting, economics of the environment, competition policy, privatization and regulation, currency stability and the link between goods and financial markets) are addressed. The course concludes with a reflection about the topic of (de)globalization (and its counter reactions) from the viewpoint of a business. In order to start this module, students must have completed their internship.  Key words:  Financial crisis; Covid-19; future of work; labor market; trade-war; robotics and shared economy; big data; AI; Blockchain; Fintech;  Comments:  The CBET module will be partly run by the students themselves with the lecturer providing background knowledge, feedback and structure. Brightspace and MS Teams are used as digital communication platforms. Additional documents about the content of the topics in the week plan will be offered through these platforms.

#### **Module Description: Business in Latin America**

Module Des	scription: Business in Latin America Elective
Credits	9 ECTS
Course Code	IB-K203-21
Entry requirements	
Programme Year	
Semester / Block	Semester 2 / Block 4
Weeks	7
Teaching Method	Lecture, Workshop
Coordinator	C. Meiller
Lecturer(s)	
Course content/outline	This elective is designed to provide both theoretical and practical information about how to do business in Latin America and with Latin American companies. Emphasis is placed on practical knowledge. Embassies, export offices, the Dutch government, and private sector guest speakers enrich the content delivered to students.  The goal of this elective is to provide labor markets with entry level, junior management candidates with relevant skills to help the set-up, development, and/or expansion of company operations in their respective (Dutch/European Union/Latin American) target markets.  The elective is made up of 3 instructional lanes:  Latin American Business Practices (LABP)  This instructional lane discusses how are specific business functions such as  Management,  Marketing & Sales,  Human Resources,  Logistics/Supply Chain,  Finance  are conducted in Latin America. Students will get to learn concepts and practices (for each business function) that are common in Latin America but not taught in European Universities.  Latin American Economic Analysis (LADD)  In this instructional lane several countries from the region will be highlighted and discussed in detail. Why is this country different, special, or remarkable? Country representatives from Latin American embassies and/or commercial export offices will provide you with a "deep dive" into their respective economies, highlighting economic, trade, and investment conditions/regulations.  Latin America Socioeconomic History & Culture (LASH)  This module gives you an understanding on Latin America's social fabric, historical background, geographical features, and the economic environment in which businesses in Latin America operate. How are current world trends affecting Latin American businesses? Additionally, several guest lecturers will provide additional insights into relevant topics for Latin American countries today.

Course content/outline	can make consume the decisic course furgiven situral per cannot be guided the changes in decision of certain decision of the changes in the change in the c	The module focuses on explaining how people behave in the way they do. People can make unexplainable decisions on, for example, buying a certain model of car, consume a certain type of food even though it is not a healthy option, etc. Basically, the decisions made on the daily basis and in business settings are considered. The course further focuses on what is considered "efficient and optimal" decision in a given situation. In addition, the students will focus on the factors behind decision making processes of different kinds of stakeholders.  Behavioural Economics brings in the psychological, social, cognitive, and cultural perspectives to explain irrational decisions and behaviours which cannot be explained by the traditional economic theories. The students will be guided through how and why Neoclassical Economics fails to address the dynamic changes in our economic systems. The course covers both micro- and macro-level decision making processes and how to mitigate unfavorable results caused by certain decisions made. Last but not least, how Behavioural Economics can be implemented to promote favorable sustainable practices (sustainability) from the perspective of a firm/an organization is also discussed in this course. Unquestionably, optimal decisions and behaviours will contribute to a growth in social welfare and economic well-being.

Entry requirements	
Year	
Semester / Block	Semester 1 / Block 2, Semester 2 / Block 4
Weeks	7
Method	Lecture, Workshop
Coordinator	Marloes Ambagts, Refiya Scheltinga
Lecturer(s)	
Course content/outline	In this intense seven-week module, students will explore the impact of a global challenge from different personal, cultural, local and disciplinary perspectives in a multidisciplinary and multicultural team, including students from THUAS IB, ES and IPM and students from international partner institutions.
	After mapping out the different actors and their interconnected needs and interests, students zoom in on a beneficiary in one of their local communities to dive deeper into their experience and come up with a plan to make a difference in this specific community.
	Besides exchanging their own perspectives, all team members will continuously connect to external parties on different local and disciplinary contexts and share their insights with the team to test their assumptions and adjust their plans, taking a design thinking approach.
	After exploring their beneficiaries' experience in detail, teams will define their own challenge and design and propose solutions to this challenge in close consultation with stakeholders in all their communities. Additionally, they will create a platform to share and exchange their ideas with each other and stakeholders in their challenge to start a dialogue and move towards new solutions together.
	Throughout the project, students will keep track of their own development in a reflection log that culminates in a multimedia reflection product.
	In doing so, students will develop their intercultural proficiency, perspective taking skills and their agency as global citizens within their local context. Maybe even more importantly, they will also create the basis for an international community and network to collaborate to make a difference in an interconnected world beyond the scope of this project.

Course content/outline	bone of the this cours European assignme various le common i	Small- and Medium-sized enterprises (SME's) are considered to be the backbone of the European economy. SME's are the EU's largest employers. During this course students will be made familiar with the relevance of SME's within the European Union (EU) and within the common market. With the help of assignments and lectures students will be analyzing EU member-states on various levels regarding its role and contribution of its SME's on the EU's common market and how to attract SME's to open a business within certain regions of the member states with the help of funding and the role of lobbying.

Course content/outline	The combination of Finance and Technology—commonly known as Fintech—is revolutionizing the way financial services are provided. The availability of the Internet and smart phones are making it possible to take most of the financial services digital. This new way of meeting customers' needs is putting enormous pressure on incumbents. Banks are under pressure to provide digital services. But their age-old legacy system is a big problem. In these circumstances, using smart technologies, start-ups are disrupting the financial services markets by offering smart solutions to satisfy customer needs better and cheaper. This is equally true for payment, investment, as well as insurance businesses. To cope with this pressure, many financial service providers, including banks, are already busy transforming their services to compete with the new entrants. Often, incumbents are cooperating with start-ups to share innovations in the financial services markets. But questions remain: How will this transformation revolutionize the financial services market? What are disruptive technologies? How are they disrupting the existing business models? How are the incumbents going to accommodate disruptive technologies? How do new innovations such as Distributed Ledger Technology going to be used by various players, including governments?  This module will cover:  • Fintech in general  • Banking  • Payment  • Insurance  • Block chain  • Distributed Ledger Technology (DLT)  • Cryptocurrency  • Central Bank Digital Currency (CBDC)

Course content/outline	There is an increasing amount of job opportunities in the Digital Marketing (DM) domain, and this elective module will equip students with more hands on training to be able to take up those jobs right after their studies. It also provides a basis to start a specific learning pathway for those students aiming to pursue a career in the content marketing arena.
	Content marketing refers to the creation and management of text, audio and video aimed at engaging customers, prospects, and search engines. Exceptional content marketing is key to gaining permission, encouraging sharing and ongoing engagement through elevating people's experience. In a context where the proliferation of channels adds another layer of complexity, this course will equip students with the skills and knowledge to be able to choose the right message, in the right moment, through the right touchpoint (online or offline), along the customer journey.
	As a next step of the Marketing & Sales specialization, Content Marketing addresses more in depth practice on how to:
	Learn a content creation framework for producing effective content on a consistent basis, connecting with the marketing strategy
	Develop engaging content for a specific marketing campaign and implement it through the digital media mix, impacting customer experience by leveraging the relevant touchpoints along its journey.
	Measure, analyze and communicate the performance of the implemented Content Marketing Plan, and propose adjustments with a continuous improvement mindset.
	The course includes local and international company cases, in both B2B and B2C arena. The course has a case-based learning approach, solving real cases.
	Within all three components, the principles of "international" and "critical thinking" will be applied. The course includes ethical and morally responsible international practices of digital marketing with a connection to the trend of purposefulness.

	project team and	The course will consist of classroom learning, guest lecturing (tentative), project team and individual work, in order to ensure hands-on experience as well as learning from best industry practices.						
	fluent level of Er	Class will be conducted in English, therefore students are expected to have a luent level of English to participate. Students should preferably have Marketing and Digital Marketing basics knowledge.

This course a company assignment representing 84 working hours (=3 ECTS) per student.  The assignment is extra-curricular and is not scheduled as a regular course in the course time-tables. The deliverables are scheduled outside the regular scheduled courses in collaboration with the company and our university.  Since there is only room for 5 students an assessment will be scheduled in order to select the best student suitable for the job. This is based on the language-, and analytical skills as well as expertise of the students.  Depending on the nature of the assignments.  The setup is as follows:  1. Assessment & selection 2. Kick-off assignment at the company and signing of an NDA 3. Students get a tutorial on how use business analysis tools 4. Followed by weekly updates and presentations on the progress either via Teams or at the company 5. Resulting in a final presentation and a portfolio with the findings
Pieter de Vos
InnovationQuarter (IQ) is the regional economic development agency for the Province of Zuid-Holland, also known as the greater Rotterdam – The Hague area. Their mission is to strengthen the regional economic structure by stimulating the innovation potential of this unique delta region. In close collaboration with all major corporations and many SME's, educational and research institutes as well as government organisations, they align the efforts required to design a brighter tomorrow.  The research results as delivered by the HHS students will be applied in the daily practice of the "International Business Unit" employees.  Within this unit, the foreign direct investment professionals promote their working area of Zuid-Holland and their main goal is to attract and retain foreign companies which are active in all kinds of economic sectors and

The general aim is to create new jobs, investments, stimulate innovation and collaboration as this will boost economic growth within the province. These activities form part of the field of Economic Promotion and originate from the tasks of the Ministry of Economic Affairs & Climate and the Province of Zuid-Holland, among other public institutes. Innovation Quarter is part of the Invest in Holland network. See www.innovationguarter.nl The actual assignments will be shared with the students at a later stage since it is based on current topics of the company. Learning outcomes **Module Learning Outcome** Level (1-3) **PLO** Learn to work independently on set goals for an innovating company. Course content/outline	In Operations and Supply Chain managing and improving processes is critical to business performance. This specialization module continues to build upon the management of processes as introduced in the year 2 module Operations & Supply. In addition, it introduces industry proven Business Improvement and Project Management methodologies to create a robust understanding of how to improve operations performance, and effectively implement changes. This includes the ability to identify and resolve ethical issues as well as building a business case (proposal) for change. To effectively achieve these objectives, a setting and behaviour comparable with a business environment will be simulated.

#### **Module Description : Sustainable Business**

<b>Module Desc</b>	ription: Sustainable Business Minor
Credits	15 ECTS
Course Code	BFM-HMVT22-SB
Entry requirements	
Programme Year	Year 3/4
Semester / Block	Semester 1 / Block 1 or Semester 2 / Block 3
Weeks	7
Teaching Method	Lectures & workshops
Coordinator	Sudhan Balakrishnan
Lecturer(s)	
Course content/outline	1. Introduction to Sustainable Business IB-K701-22 (ISB 4 ECTS)  The module will teach how business can become (more) sustainable following the circular economy requisites. Students will critically look at existing linear business models (produce, use and dispose) and actively look for business solutions to become sustainable. We will explore the business environment, global changes and industrial revolutions which have taken place so far and that are based in the actual linear economy. Students will explore, analyse and possibly create new views towards business performances via presentations and an individual essay.  2. Sustainable Business Challenges IB-K705-22 (SBC 4 ECTS)  The module will intrinsically explore sustainable business models and practices and their impact on business, society and environment. We critically look at linear business models; produce, use and dispose. Also, we critique how businesses and stakeholders affect the balance between economy, society and environment in local and global contexts. By the end of this module, students will be able to formulate sustainable strategies and solutions for business to balance environmental, social and economic development. In doing so, they will be changemakers in the international business environment.
	3. CSR and Global Supply Chain IB-K702-22 (CSR 4 ECTS) Business activities have both significant positive and negative impacts on societies. Whereas efficient supply chain operations help businesses deliver the needed goods and services to consumers, they can also impact the environment and people negatively, when not done responsibly. Some of these impacts include emission of greenhouse gas, poor wages, worker's rights issues, overconsumption due for example to fast-fashion models, waste generations, and filling of landfills, to mention a few. The course discusses these issues, but more importantly, explores options for firms to run a sustainable supply chain, and the value this can create. In this course students learn how to identify the impact of supply chain operations on people and the environment, and the role of corporate governance.

#### 4. Guest Lectures IB-K703-22 (GL 3 ECTS)

Sustainable Business is not just theory or a collection of case studies in books and articles; most and foremost it is a reality that is practiced daily in increasing numbers of businesses and organizations. In the Guest Lectures module, students will be exposed to a broad variety of presenters from startups to large corporations, from NGO's to people from the political field. They will listen to sustainability challenges and best practices, and have ample opportunity for critical engagement with these presenters via Q&A's, discussions and in some cases even short workshops. By the end of this course students will have been exposed to a broad range of practical information and real life experiences with sustainable business. This will increase insight in the concrete applicability of the knowledge and skills presented in the other three courses in the minor, and add to students' own sustainable business solutions toolkit.

#### Learning outcomes

PLO NEW	PLO CUR.	Module Learning Outcome	Level (1-3)
PLO2	WT3	Critique how business transitions towards sustainable approach.	2
PLO2	TWM24	Analyse a trend or business problem related to sustainable business, linking local to global contexts through independent, applied research.	2
PLO1	WT2/LW10	Formulate sustainable business strategies and solutions through the analysis of theory and real-life business cases related to business and stakeholder performance in a changing business environment.	2
PLO2 /PLO3	TWM 20	Analyse CSR strategies for a sustainable supply chain.	2
PLO4	WT1/WW4	Apply relevant insights, theories and concepts from academic sources to draw conclusions in a methodical manner and express these fluently and correctly in speech and writing.	2

Course content/outline	students currently (internation to support sustainable Students actively at & Doing, will lead to up compare	This minor adopts mostly an action-oriented approach (learning by doing) where students in an explorative way gain business-oriented insights to transform a currently existing business model into a business model which fits local (international) circumstances. Additionally, an analytical approach is being added to support students in developing a strategic vision on their business models' sustainability based on the Sustainable Development Goals (SDGs).  Students will be challenged to develop their entrepreneurial mindset & skills and actively apply them by executing several assignments based on Design Thinking & Doing, Business Model Canvas and Frugal Innovation. Newly gained insights will lead to bootstrapped business models which can be the foundation of start-up companies abroad. This is not mandatory.  Key words: business model experimentation & generation, frugal innovation,

Course content/outline	The business world has shown an increasing need for talents with advanced data analytic skills and strong capabilities to translate and communicate findings in an accessible way. These highly sought-after skills help organizations to tackle business problems and make decisions based on a deep understanding of hard evidence.  Big data analytics helps organizations to get the most out of their data in various aspects, including identifying new opportunities, better-allocating investments, developing better customer insights, designing more innovative marketing strategies, devising more efficient operations, and discovering new products and services.  During the course, the students will be introduced to Data Analytics within a business environment. The students will learn and practice several commonly used business analytics techniques that can help them to setup analytics projects in their future organizations. The students will also learn and practice the interpretation of results and decision making based on the analysis.  3 ECTS: Data visualization (DV)  6 ECTS: Data analytics (DA)  6 ECTS: Capstone project (project)

#### **Module Description : Business - NGO Collaborations**

Module Desci	ription: Business - NGO collaborations Minor
Credits	15 ECTS
Course Code	IB-HMVT23
Entry requirements	
Programme Year	
Semester / Block	Semester 2 / Block 3
Weeks	7
Teaching Method	lecture, workshop, and guest lectures
Coordinator	Mr. Emmanuel Ekpenyong
Lecturer(s)	Mr Emmanuel Ekpenyong, Dr Angela Roe
Course content/outline	Businesses and Non-Governmental Organizations (NGOs) are important organizations in today's world, but they have different goals. Whereas business seeks to make profits by solving societal challenges, NGOs have a different priority. NGOs are seen "as social, cultural, legal, and environmental advocacy and/or operational groups that have goals that are primarily non-commercial." (Kourula and Laasonen, 2009). Partly due to this reason, the relationship between international businesses and NGOs can sometimes be contentious, but in other situations, it can be mutually beneficial.  The course explores this tension while focusing on how positive collaboration in the form of cross-sector partnership between the two organizations can leverage the strengths of both parties in the delivery of Sustainable Development Goals.  The course starts with an introduction to an understanding of NGOs in terms of their goal and operating model. It further exposes the students to the different types of NGOs.
	types of NGOs. Students will also learn about the meaning of the so-called 'wicked' problems and why it requires collaborations amongst diverse stakeholders groups for society to tackle these types of challenges.
	The course closes with a look at cross-sector partnership. A cross-sector partnership is a significant interaction between organizations from different sectors, in this case, businesses and NGOs, to address a common goal (Clarke & Crane, 2018). It is fairly accepted that no one organization has the resources and competencies to solve the complex socio-economic challenges of our time. Cross-sector collaborations between business and NGOs is recognized as a powerful vehicle for addressing these challenges and helping to achieve the SDGs. The course will discuss this collaboration in general, and in particular, it will look at their benefits for the society, firm, and the NGO. It will also explore the challenges involved in such collaboration.  The course will be divided into two parts, the first part is a regular course with lectures and workshop, while the second part will be 7 guest lectures delivered by NGO and business management staff with experience in business-NGO

#### Minor #HYF Blockchain, AI & Quantum (15 ECTS)

Description of	Description text					
components						
Title & language	#HYF Blockchain, Al & Quantum (15 ECTS)					
	is minor will be taught in English, and students may submit assignments Dutch if allowed by their main study program.					
Туре	Minor (15 ECTS)					
Faculty/program offering the minor	Program: Finance & Control Faculty Business, Finance & Marketing (BFM)					
Contact person	General Co-ordinators Minor:  Malva Ahmed (m.p.ahmed@hhs.nl) & Jamie Jansen (j.jansen@hhs.nl)					
General Objectives	General Objective					
	The main aim is for students to fully understand blockchain technology and its impact on society and every day life. This program is designed in a flexible way, allowing students to mix mandatory elements with personal growth, 21st-century life skills, and a cross-functional program about fintech and trading. All of this is to prepare students for the challenges of a changing world.  Main Learning Goals:					
	<ol> <li>Understanding Blockchain: By the end of this minor, students should not only be able to explain the fundamental principles of blockchain technology but also demonstrate its practical application in both personal and professional contexts.</li> <li>Analyzing Blockchain Impact: Students should be able to critically assess how blockchain technology affects society at different levels, from local to global.</li> </ol>					
	Optional Learning Goals:					
	<ol> <li>Personal Growth and Life Skills: Students should be able to use practical skills like mindfulness, deep learning, and effective communication in both personal and professional situations.</li> <li>Evaluating Fintech and Trading: By the end of the program, students should be capable of evaluating strategies and practices in fintech and trading, making informed decisions and recommendations.</li> </ol>					
Intro	#HackYourFuture – to truly excel in a world that's changing at warp speed, you need to be at the forefront. In this minor, we teach how to apply new					

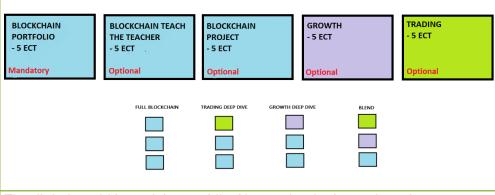

technologies and how to tap into your true potential. Become an expert in technologies such as blockchain and cryptocurrencies, delve into quantum computing or the application of basic Al in life. Join us and expand the boundaries of your human potential with advanced life skills like mindfulness, peak performance, or how to copy the habits of champions. Awaken your potential and embark on a journey that will fundamentally redefine your academic and personal life. We offer:

- A minor rated 9/10 and winner Dutch Blockchain Award for Meaningful Education
- Gamified classes, guest speakers, networking opportunities like events and weekly drinks
- Strong focus on personal growth & development
- Highly flexible study schedule
- ECT-assignments that can be done in Dutch
- A community approach with a Discord community of over 2000 members
- A minor suitable for non-tech students

## Structure 15 & 30 ECT Minors

There are two variants of the Blockchain minor, 15 & 30 ECT. Both Minors start simultaneously, so 15 ECT and 30 ECT classes begin together. After ten weeks, the first period, students of the 15 ECT variant are finished. Students of the 30 ECT variant then continue with the second part for more profound knowledge, skills, and network. This second part is another ten weeks.

The 15 ECTS consists of three parts, each worth 5 ECTS, while the 30 ECTS comprises six parts, also valued at 5 ECTS each. The minor consists of a main mandatory part worth 5 ECTS, along with two optional parts that students can select based on their interests and skills. The minor can be customized to suit the educational preferences of the student, including the option to swap parts with other minors. For further details, please refer to the 'Description of Tests and the Minimum Pass Rate'.

## Reason for this Minor

The digital world is evolving rapidly. New technologies and services are paving the way to a decentralized internet: Web3.0, a user-centric internet powered by blockchain technology. Unfortunately, current economic models seem unsustainable and unstable. There is an ever-growing inequality, not only between those that have and have not (rich and poor), but also between those that know and don't know the inner workings of technology.

New technologies make it possible to quickly reinvent current models, including people from all society layers. First, however, these models need to be tried, tested, and developed further. Education/learning plays an essential role in this.

Humanity seems to be at a tipping point. There appears to be a clear understanding that we need to change our behavior and rethink our way forward. Technology can help us in this process. In the next five to ten years, available technologies will provide the infrastructure for this change.

The internet was a giant first step. But, our internet is still flawed and is not censorship-resistant, resulting in abuse of power by those that can gain control over parts of it. Blockchains could provide us with a solution to this and many more problems. Furthermore, current financial models exclude a considerable part of the world's population. In the next decade, the internet, mobile phones, AI, the internet of things, and blockchain technology offer us an opportunity to drastically change how the world works. Adding new properties to the web. Creating a new web with data sovereignty, strong financial incentives, and other unique properties.

This Minor is grabbing this opportunity with both hands, realizing the problems above can be dealt with. With a focus on, but not limited to, the financial, legal, and technological aspects of the issues that we face, we will educate and prepare people from all corners of our societies. This transition doesn't happen without getting our hands dirty, and we want to be at the frontline of this transition.

#### Important Educational Elements

- 1. Multidisciplinary Minor offers theoretical foundations in a blended form via <a href="https://app.koios.world/#/worlds">https://app.koios.world/#/worlds</a> and offline university locations (The Hague). Online is the commonly shared foundation and created by an ecosystem of multiple partners. Offline, every entity can deviate and add its regional flavor to the mix. Students run a joined multidisciplinary blockchain-related social assignment for and with an external field partner rather than acquire only theoretical knowledge. An example would be: solve blockchain issue XXX for organization XXX. In short, shared solid online theoretical foundations with offline regional spin-offs in classes and regional field assignments.
- 2. Another important aspect is that students can determine their paste and route in assignments. Not only can they choose to stick to the regular program or accelerate within the program (for example, select multiple specializations in the second part). In addition, students can pick additional optional-routes by choosing topics & assignments for their portfolio, choosing the field assignment, or participating in many extracurricular activities, like visiting events, joining meet-ups in social communities, participating in hackathons.

- 3. Alongside the practical integration, our Lectorates, like 'New Finance' with Martijn van der Linden, are also partly integrated with the Minor and participate in guest lecturers and project guidance. Moreover, together with multiple field experts, they will also facilitate delivering researched content and in-network events, assignments, etc. Therefore, the Minor will be closely intertwined with the Centre of Expertise "Digital Operations & Finance."
- 4. The KOIOS infrastructure <a href="https://app.koios.world/#/worlds">https://app.koios.world/#/worlds</a> hosts this Minor. Therefore, students can also follow lectures and courses of the other minors.
- 5. Community-Driven Curriculum: Our curriculum is driven by a strong sense of community, promoting collaboration and active involvement among students and partners. This approach involves numerous networking events featuring refreshments, as well as a dedicated blockchain education week in collaboration with field partners. We actively co-create our content with field experts, specialized organizations, and communities to ensure students have access to the most up-to-date knowledge, skills, and an extensive network.

# Learning outcomes & Summary of contents

Fundamentals, also separately available as "introduction to blockchain" for 15 ECT's. We describe the first two levels during this period, offered via <a href="https://app.koios.world/#/worlds/blockchain">https://app.koios.world/#/worlds/blockchain</a>, so level 1 and level 2. The primary outcome of the multidisciplinary period A is that students can:

#### **Topics:**

- All about Money
- Open Financial Systems
- Decentralized Autonomous Organisations
- Governance
- Smart Contracting & algorithmic decision making
- Self-sovereign identity
- IoT, AI, Big Data (highlights)
- Innovation management
- Public & private blockchains
- Crypto & Token Economics
- Network Effects & building ecosystems

	- Layer Solutions
	- Cyber Security & Risk Management
	<ul> <li>Blockchain &amp; Accounting (triple entry accounting or single-entry accounting)</li> </ul>
	- Blockchain & Insurance
	- Blockchain & Banking
	- Blockchain & Trading Assets
	- Blockchain in practice & use cases
Target group	As a multidisciplinary topic, this course is open to all. Our experience has shown that students from diverse backgrounds enroll in this course. The minor starts from the basics and is fully adaptable and flexible to meet your educational needs.
Entry requirements	Intermediate English proficiency is required. Assignments may be submitted in Dutch if your main program also allows it. Prior knowledge is not necessary; the minor welcomes students starting from scratch.
Final objectives/	The previously discussed general objectives are tied to learning outcomes
competencies	derived from F&C program (origin minor).
(summary)	, , , , , , , , , , , , , , , , , , ,
	<ol> <li>Selecting and applying appropriate analysis methods to make the right decisions by an organization.</li> </ol>
	<ol> <li>Professionals can translate practical questions in organizations based on critical analysis into a concrete knowledge need. And answer these with realistic, feasible advice or designs (e.g., product, process, model), focusing on decision making that leads to improvement or renewal of practical situations.</li> </ol>
	3. Professionals are advisory. This means, among other things, that they are communicative in word / and writing, also in an international context. In addition, finance professionals are agile because they can reflect on their own actions and learning process and adjust their actions accordingly.
Description of tests and the minimum pass rate	<ol> <li>Main Portfolio: In the lessons, weekly tests are administered, of which four out of five must be passed. Students must not have missed more than three lessons and must pass at least four tests. Additionally, students will actively manage a portfolio in which theoretical knowledge and practical skills are tested. This part must be completed with a pass (pass/fail). It is a mandatory requirement for</li> </ol>

every student of the minor to complete in order to finish the minor. (5 ECTS)

- 2. **Teach the Teacher:** Students need to submit weekly video assignments, one video per week. In these assignments, students must explain a subject from that week's curriculum. It's a "teach the teacher" assignment. This part needs to be passed (pass/fail). It is an optional route that students can take to earn 5 ECTS.
- 3. **Growth Course**: The growth course that we are offering requires students to submit a reflection report along with their weekly assignments upon completion. This is an optional route that students can take to earn 5 ECTS.
- 4. **Field Assignment:** This assignment involves solving a real-life blockchain problem in a group format. The format of the output differs per assignment and assignment provider. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

**Optional:** Students may also replace one of the optional parts of this minor with one of the optional parts of the "Trading Digital & Financial Assets" minor. For more information about these options, please refer to the minor description of this minor and discuss with the teachers.

**Total Grade**: Students can fully complete the minor and receive their full points, or they can receive partial points for each completed part.

## Teaching methods + study load

#### Teaching method(s):

Blended learning, classical education, individual and team assignments, presentations, portfolio's and reports. Tokenized education.

#### Study load:

- Web colleges at their own pace. Application of blended learning where students prepare the material at home and come to class to discuss the material. In addition, the homework assignments for the portfolio are related to the teaching material.
- Classes, Tutorials, plus Lectures from guest speakers.
- Intensive contact with industry, i.e., advisory report.
- Individual portfolio
- We strongly encourage ecosystem learning (on- and offline) via KOIOS.
- Minor is considered to be intensive but instructive by students.

An example student route has been calculated in the table below. This is the case for a student who follows the full Blockchain programme and doesn't chose to replace parts wit the other optional parts.

Contact time	Weeks	Hours	Total hours
Lectures	8	12	96

	Weekly test	6	0.5	3

### Minor #HYF Blockchain, AI & Quantum (30 ECTS)

Description of	Description text		
components			
Title & language	#HYF Blockchain, Al & Quantum (30 ECTS)		
	This minor will be taught in English, and students may submit assignments in Dutch if allowed by their main study program.		
Faculty/program offering the minor	Program: Finance & Control Faculty Business, Finance & Marketing (BFM)		
Contact person	General Co-ordinators Minor: Malva Ahmed (m.p.ahmed@hhs.nl) & Jamie Jansen (j.jansen@hhs.nl)		
General Objectives	Period 1. Main Introduction to Blockchain (15 ECT)		
	<ol> <li>Understanding Blockchain: By the end of this minor, students should not only be able to explain the fundamental principles of blockchain technology but also demonstrate its practical application in both personal and professional contexts.</li> <li>Analyzing Blockchain Impact: Students should be able to critically assess how blockchain technology affects society at different levels, from local to global.</li> <li>Period 2. Deep dive (30 ECT)</li> <li>Practical Application Design: Design, invent, or build a practical application to solve a blockchain-related functional problem. Formulate implementation advice for the application.</li> </ol>		
	<ol> <li>Analysis and Impact Assessment: Recognize opportunities and threats within an organization due to blockchain technology. Provide advice for organizations based on blockchain insights. Discuss the broader impact and possibilities of blockchain technology on global topics such as Sustainable Development Goals (SDG) and financial systems like the monetary system and global exchange systems.</li> </ol>		
	Optional Learning Goals:		
	<ol> <li>Personal Growth and Life Skills: Students should be able to use practical skills like mindfulness, deep learning, and effective communication in both personal and professional situations.</li> <li>Evaluating Fintech and Trading: By the end of the program, students should be capable of evaluating strategies and practices in fintech and trading, making informed decisions and recommendations.</li> </ol>		

#### Intro

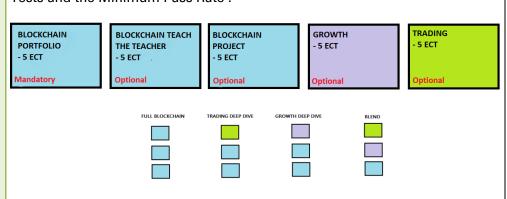

#HackYourFuture – to truly excel in a world that's changing at warp speed, you need to be at the forefront. In this minor, we teach how to apply new technologies and how to tap into your true potential. Become an expert in technologies such as blockchain and cryptocurrencies, delve into quantum computing or the application of basic Al in life. Join us and expand the boundaries of your human potential with advanced life skills like mindfulness, peak performance, or how to copy the habits of champions. Awaken your potential and embark on a journey that will fundamentally redefine your academic and personal life. We offer:

- A minor rated 9/10 and winner Dutch Blockchain Award for Meaningful Education
- Gamified classes, guest speakers, networking opportunities like events and weekly drinks
- Strong focus on personal growth & development
- Highly flexible study schedule
- ECT-assignments that can be done in Dutch
- A community approach with a Discord community of over 2000 members
- A minor suitable for non-tech students

## Structure 15 & 30 ECT Minors

There are two variants of the Blockchain minor, 15 & 30 ECT. Both Minors start simultaneously, so 15 ECT and 30 ECT classes begin together. After ten weeks, the first period, students of the 15 ECT variant are finished. Students of the 30 ECT variant then continue with the second part for more profound knowledge, skills, and network. This second part is another ten weeks.

The 15 ECTS consists of three parts, each worth 5 ECTS, while the 30 ECTS comprises six parts, also valued at 5 ECTS each. The minor consists of a main mandatory part worth 5 ECTS, along with two optional parts that students can select based on their interests and skills. The minor can be customized to suit the educational preferences of the student, including the option to swap parts with other minors. For further details, please refer to the 'Description of Tests and the Minimum Pass Rate'.

The structure above is similar for the second block of the 30 ECTS.

## Reason for this Minor

The digital world is evolving rapidly. New technologies and services are paving the way to a decentralized internet: Web3.0, a user-centric internet powered by blockchain technology. Unfortunately, current economic models seem unsustainable and unstable. There is an ever-growing inequality, not

only between those that have and have not (rich and poor), but also between those that know and don't know the inner workings of technology.

New technologies make it possible to quickly reinvent current models, including people from all society layers. First, however, these models need to be tried, tested, and developed further. Education/learning plays an essential role in this.

Humanity seems to be at a tipping point. There appears to be a clear understanding that we need to change our behavior and rethink our way forward. Technology can help us in this process. In the next five to ten years, available technologies will provide the infrastructure for this change.

The internet was a giant first step. But, our internet is still flawed and is not censorship-resistant, resulting in abuse of power by those that can gain control over parts of it. Blockchains could provide us with a solution to this and many more problems. Furthermore, current financial models exclude a considerable part of the world's population. In the next decade, the internet, mobile phones, AI, the internet of things, and blockchain technology offer us an opportunity to drastically change how the world works. Adding new properties to the web. Creating a new web with data sovereignty, strong financial incentives, and other unique properties.

This Minor is grabbing this opportunity with both hands, realizing the problems above can be dealt with. With a focus on, but not limited to, the financial, legal, and technological aspects of the issues that we face, we will educate and prepare people from all corners of our societies. This transition doesn't happen without getting our hands dirty, and we want to be at the frontline of this transition.

# Important Educational Elements

- 1. Multidisciplinary Minor offers theoretical foundations in a blended form via <a href="https://app.koios.world/#/worlds">https://app.koios.world/#/worlds</a> and offline university locations (The Hague). Online is the commonly shared foundation and created by an ecosystem of multiple partners. Offline, every entity can deviate and add its regional flavor to the mix. Students run a joined multidisciplinary blockchain-related social assignment for and with an external field partner rather than acquire only theoretical knowledge. An example would be: solve blockchain issue XXX for organization XXX. In short, shared solid online theoretical foundations with offline regional spin-offs in classes and regional field assignments.
- 2. Another important aspect is that students can determine their paste and route in assignments. Not only can they choose to stick to the regular program or accelerate within the program (for example, select multiple specializations in the second part). In addition, students can pick additional optional-routes by choosing topics & assignments for their portfolio, choosing the field assignment, or participating in many extracurricular activities, like visiting events, joining meet-ups

in social communities, participating in hackathons.

- 3. Alongside the practical integration, our Lectorates, like 'New Finance' with Martijn van der Linden, are also partly integrated with the Minor and participate in guest lecturers and project guidance. Moreover, together with multiple field experts, they will also facilitate delivering researched content and in-network events, assignments, etc. Therefore, the Minor will be closely intertwined with the Centre of Expertise "Digital Operations & Finance."
- 4. The KOIOS infrastructure <a href="https://app.koios.world/#/worlds">https://app.koios.world/#/worlds</a> hosts this Minor. Therefore, students can also follow lectures and courses of the other minors.
- 5. Community-Driven Curriculum: Our curriculum is driven by a strong sense of community, promoting collaboration and active involvement among students and partners. This approach involves numerous networking events featuring refreshments, as well as a dedicated blockchain education week in collaboration with field partners. We actively co-create our content with field experts, specialized organizations, and communities to ensure students have access to the most up-to-date knowledge, skills, and an extensive network.

# Learning outcomes & Summary of contents

#### **Period 1 Introduction to Blockchain**

Fundamentals, also separately available as "introduction to blockchain" for 15 ECT's. We describe the first two levels during this period, offered via <a href="https://app.koios.world/#/worlds/blockchain">https://app.koios.world/#/worlds/blockchain</a>, so level 1 and level 2. The primary outcome of the multidisciplinary period A is that students can "explain at a detailed level which technological, financial and legal characteristics blockchain technology has. And which socio-economic impact these characteristics have on a national and global scale.

#### Period 2 Deep dive

The student explains the blockchain technology compared with various parts of the business (finance, control, and management process design, strategy, information analyses) and at the social level. Then, the student designs / invents/builds a practical application in which a blockchain-related functional problem is solved and where implementation advice is formulated. In other words, the student can recognize opportunities and threats within an organization due to blockchain technology and can provide an organization with advice and, in cooperation with fellow students, to come to a (partial) implementation of the proposal.

#### Topics:

- "All about Money"

	- Open Financial Systems
	- Decentralized Autonomous Organizations
	- Governance
	- Smart Contracting & algorithmic decision making
	- Self-sovereign identity
	- IoT, AI, Big Data (highlights)
	- Innovation management
	- Public & private blockchains
	- Crypto & Token Economics
	- Network Effects & building ecosystems
	- Layer Solutions
	- Cyber Security & Risk Management
	<ul> <li>Blockchain &amp; Accounting (triple entry accounting or single-entry accounting)</li> </ul>
	- Blockchain & Insurance
	- Blockchain & Banking
	- Blockchain & Trading Assets
	- Blockchain in practice & use cases
Target group	As a multidisciplinary topic, this course is open to all. Our experience has shown that students from diverse backgrounds enroll in this course. The minor starts from the basics and is fully adaptable and flexible to meet your educational needs.
Entry requirements	Intermediate English proficiency is required. Assignments may be submitted in Dutch if your main program also allows it. Prior knowledge is not necessary; the minor welcomes students starting from scratch.
Final objectives/ competencies (summary)	1. Provide a contribution to the design of the management control system aimed at managing, controlling, and monitoring an organization, such that the (strategic) goals are achieved.
	2. Select and apply appropriate analysis methods to make the right decisions.

3. Finance professionals can translate practical questions in organizations based on critical analysis into a concrete knowledge need and answer these with realistic, feasible advice or designs (e.g., product, process, model),

focusing on decision making that leads to improvement or renewal of practical situations.

4. Finance professionals are advisory. This means, among other things, that they are communicative in word / and writing, also in an international context. In addition, finance professionals are agile because they can reflect on their own actions and learning process and adjust their actions accordingly.

#### Description of tests and minimum pass rate

#### First block (first 15 ECTS)

- Main Portfolio: In the lessons, weekly tests are administered, of which
  four out of five must be passed. Students must not have missed more
  than three lessons and must pass at least four tests. Additionally,
  students will actively manage a portfolio in which theoretical knowledge
  and practical skills are tested. This part must be completed with a pass
  (pass/fail). It is a mandatory requirement for every student of the minor to
  complete in order to finish the minor. (5 ECTS)
- Teach the Teacher: Students need to submit weekly video assignments, one video per week. In these assignments, students must explain a subject from that week's curriculum. It's a "teach the teacher" assignment. This part needs to be passed (pass/fail). It is an optional route that students can take to earn 5 ECTS.
- Growth Course: The growth course that we are offering requires students
  to submit a reflection report along with their weekly assignments upon
  completion. This part needs to be passed (pass/fail). This is an optional
  route that students can take to earn 5 ECTS.
- 4. **Field Assignment**: This assignment involves solving a real-life blockchain problem in a group format. The format of the output differs per assignment and assignment provider. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

#### Second Block (Second 15 ECTS)

- 1. Main Portfolio: In the lessons, weekly tests are administered, of which four out of five must be passed. Students must not have missed more than three lessons and must pass at least four tests. Additionally, students will actively manage a portfolio in which theoretical knowledge and practical skills are tested. This part must be completed with a pass (pass/fail). It is a mandatory requirement for every student of the minor to complete in order to finish the minor. (5 ECTS)
- 2. **Teach the Teacher:** Students need to submit weekly video assignments, one video per week. In these assignments, students

must explain a subject from that week's curriculum. It's a "teach the teacher" assignment. This part needs to be passed (pass/fail). It is an optional route that students can take to earn 5 ECTS.

- 3. Growth Course: The growth course that we are offering requires students to submit a reflection report along with their weekly assignments upon completion. This part needs to be passed (pass/fail). This is an optional route that students can take to earn 5 ECTS. "Students who have already completed the growth course in the first block will enroll in the advanced program, while students who did not select it in the first block will be placed in the basic program.
- 4. **Field Assignment**: This assignment involves solving a real-life blockchain problem in a group format. The format of the output differs per assignment and assignment provider. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

**Optional:** Students may also replace one of the optional parts of this minor with one of the optional parts of the "Trading Digital & Financial Assets" minor. For more information about these options, please refer to the minor description of this minor and discuss with the teachers.

**Total Grade**: Students can fully complete the minor and receive their full points, or they can receive partial points for each completed part.

## Teaching methods + study load

#### Teaching method(s):

Blended learning, classical education, individual and team assignments, presentations, portfolio's and reports. Tokenized education.

#### Study load:

- Web colleges at their own pace. Application of blended learning where students prepare the material at home and come to class to discuss the material. In addition, the homework assignments for the portfolio are related to the teaching material.
- Classes, Tutorials, plus Lectures from guest speakers.
- Intensive contact with industry, i.e., advisory report.
- Individual portfolio
- We strongly encourage ecosystem learning (on- and offline) via KOIOS.
- Minor is considered to be intensive but instructive by students.

An example student route for the first block has been calculated in the table below. This is the case for a student who follows the full Blockchain programme and doesn't chose to replace parts wit the other optional parts.

Contact time Weeks Hours Total hours

#### Minor #HYF Trading Digital & Financial Assets (TDFA)

Description of components	Description text (wherever the text says 'minor', it can also be read as elective module)
Title & language	#HYF Trading Digital & Financial Assets (TDFA)
	This minor will be taught in English, and students may submit assignments in Dutch if allowed by their main study program.
Туре	Minor (15 ECTS)
Faculty/ programme offering the minor	Program: Finance & Control Faculty: Business, Finance, Marketing (BFM)
Contact person	General Co-ordinators Minor:  Malva Ahmed (m.p.ahmed@hhs.nl) & Jamie Jansen (j.jansen@hhs.nl)
General	General Objectives:
Objectives	The 21 <sup>st</sup> century asks for 21 <sup>st</sup> -century education. Here at THUAS, we encourage our students to not only leave university with a degree but also with 21 <sup>st</sup> -century skills. We want students to become world citizens, in our case familiar with the workings of global financial systems and their financial products (assets). Becoming a world citizen isn't easy. It means that, other than understanding the theory, you would also need to adjust your mindset and behavior, and for that, you also need insights and training.
	The art of doing
	We therefore combine theory, practice and the "art of doing/experiencing" in this minor. We believe that real-life trading and managing of digital financial assets, backed by theory and backed by field experts, will act as a bridge towards understanding these types of assets. We expect this minor to act as a gateway for students to further investigate and reflect upon current and new financial systems, like our monetary systems. We aim to broaden the student's horizon, learning by doing and experiencing first-hand, resulting in finance professionals equipped with not only an understanding of but also experience in managing financial assets and the global financial systems of the 21 <sup>st</sup> century that we all are part of.
	Multidisciplinary approach
	Other than the integration of field experts, other disciplines like sustainability, IT and Cyber security and (inter)national partners. This multidisciplinary approach aims to create a multidisciplinary view of the world for our future finance professionals.
	Topics of content
	A Technical Analysis of Digital Financial Assets: this is the mathematical approach of reading charts and graphs and base future prediction upon the past.

- 2. A Fundamental Analysis of Digital Financial Assets: here we analyse underlying core elements of the asset. Using quantitative and qualitative analysis, also including non-financial fundamental elements ("integrated reporting").
- 3. Global Systems: this is where we focus on the current global systems, like our monetary or exchanges systems, and upcoming new financial systems like decentralised exchanges or decentralised financial products (global inclusiveness).
- 4. SDG's: we will bridge finance and the role it plays regarding the SDG's. We will teach students, and let them experience on their own, how they as future finance professionals, can contribute themselves to the SDG's in a more sustainable and inclusive way, while managing financial assets.
- 5. Psychology and behaviour: We confront students with their emotions, feelings and behaviour. A large part of our behaviour and choices are visible when acting under pressure (for example, when you trade and open a position). This is where we offer students insight and tools to better themselves and their skill set.

#### Flexible and personal study elements

We will offer this course in a blended variant and use innovative educational tools to incentivize study behaviour. Examples are digital tokens and badges, but also high-level trading software. It will also be offered via the KOIOS open infrastructure, enabling a platform for students to connect with other enthusiasts worldwide and enabling flexible personal elements like learning at your own pace or choice in assignments. Students can also follow lectures and courses of the other minors.

#### **Optional Learning programms/goals:**

**Personal Growth and Life Skills:** Students should be able to use practical skills like mindfulness, deep learning, and effective communication in both personal and professional situations.

**Understainding Blockchain:** By the end of this minor, students should not only be able to explain the fundamental principles of blockchain technology.

#### Intro

#HackYourFuture – Are you interested in understanding the financial markets of today and tomorrow?

Join our Trading and Investing minor (TDFA) and learn how to navigate the rapidly changing world of finance. With the rise of digitalization and cryptocurrencies, financial markets are evolving at a fast pace. Our program will give you the knowledge and skills you need to stay ahead of the curve. We delve into the history of financial markets, and explore the latest trends and technologies, including blockchain, cryptocurrencies and digital assets. We cover stocks, bonds, ETFs, and commodities, and equip you with the tools to trade and invest responsibly. We also provide a platform for you to practice with real money in a trading competition setting. But we do more: we also equip you with both the personal development knowledge and skills needed to tap into your true potential. After this course you can navigate the rapidly evolving world of financial

technology, and you have gained the necessary life skills to excel in any endeavour.

### Structure 15 & 30 ECT Minors

There are two variants of the Trading & Investing minor, 15 & 30 ECT. Both Minors start simultaneously, so 15 ECT and 30 ECT classes begin together. After ten weeks, the first period, students of the 15 ECT variant are finished. Students of the 30 ECT variant then continue with the second part for more profound knowledge, skills, and network. This second part is another ten weeks.

The 15 ECTS consists of three parts, each worth 5 ECTS, while the 30 ECTS comprises six parts, also valued at 5 ECTS each. The minor consists of a main mandatory part worth 5 ECTS, along with two optional parts that students can select based on their interests and skills. The minor can be customized to suit the educational preferences of the student, including the option to swap parts with other minors. For further details, please refer to the 'Description of Tests and the Minimum Pass Rate'.

## Summary of contents

#### **Topics of content**

**FULL TRADING** 

- 1. A Technical Analysis of Digital Financial Assets: this is the mathematical approach of reading charts and graphs and base future prediction upon the past.
- 2. A Fundamental Analysis of Digital Financial Assets: here we analyses underlying core elements of the asset. Uses quantitative and qualitative analysis, also includes non-financial fundamental elements ("integrated reporting").
- 3. Global Systems: this is where we focus on the global current systems, like our monetary or exchanges systems, and upcoming new financial systems like decentralised exchanges or decentralised financial products (global inclusiveness).
- 4. SDG's: we will bridge finance and with the role it plays regarding the SDG's. We will teach students, and let them experience on their own, how they as future finance professionals can contribute themselves to the SDG's in a more sustainable and inclusive way, while managing financial assets.
- 5. Psychology and behaviour: this is where we confront students with their emotions, feelings and behaviour. A large part of our behaviour and choices are

#### visible when acting under pressure (for example when you trade and open a position). This is where we offer students insight and tools to better themselves and their skill set. Target group As a multidisciplinary topic, this course is open to all. Our experience has shown that students from diverse backgrounds enroll in this course. The minor starts from the basics and is fully adaptable and flexible to meet your educational needs. Intermediate English proficiency is required. Assignments may be submitted in **Entry** requirements Dutch if your main program also allows it. Prior knowledge is not necessary; the minor welcomes students starting from scratch. Final objectives/ Desired competencies. These competencies can be traced back to the competencies professional (domain) competencies for the programme(s) offering the minor. Competencies are always on the university of applied sciences level. For a transfer minor, these competencies should be derived from the academic competency profiles. 1. Provide a contribution to the design of the management control system aimed at the management, control and monitoring of an organization, such that the (strategic) goals are achieved. 2. Selecting and applying appropriate analysis methods aimed at taking the right decisions by an organization. 3. Finance professionals can translate practical questions in organizations on the basis of a critical analysis into a concrete knowledge need and answer these with practical, feasible advice or designs (e.g. product, process, model), focusing on decision making that leads to improvement or renewal of practical situations . 4. Finance professionals are advisory. This means, among other things, that they are communicative in word / and writing, also in an international context. Finance professionals are agile because they can reflect on their own actions and their own learning process and can adjust their actions accordingly. The above are the Finance & Control Program Learning Outcomes (PLO's) LO1: The student is able to evaluate (15 ECT) and create (30 ECT) entry and exit trading points based on fundamental as well as technical aspects of trading LO2: The students is able to apply trading skills into practice and will be able to actively manage a trading/investing portfolio (15 ECT) and participate in trading research field projects (30 ECT) LO3: The student will learn the fundamentals of financial markets, macroeconomic tendencies, their history and their implications on the world economy (15 ECT) and evaluate them with global market tendencies (30 ECT) LO4: The student will be able to analyse (15 ECT) and evaluate (30 ECT) the financial results of companies (listed on stock exchanges) LO5: The student learns extensive risk and investment management strategies and apply them in a live trading competition for 10 weeks (15 ECT) or 20 weeks (30 ECT).

LO6: The student will learn to work in a team of traders, collectively and actively managing a portfolio and act as advisors to employers and/or trading/investment funds (15 ECT). Students can create a trading strategy based, based on this portfolio managing (30 ECT)

LO7: The student will learn how to recognize and improve Psychologic elements of trading (15 ECT) and how to apply them in TA and FA (30 ECT)

#### Description of tests and minimum pass rate

- 1. Main Portfolio: In the lessons, weekly tests are administered, of which four out of five must be passed. Students must not have missed more than three lessons and must pass at least four tests. Additionally, students will actively manage a portfolio in which theoretical knowledge and practical skills are tested. This part must be completed with a pass (pass/fail). It is a mandatory requirement for every student of the minor to complete in order to finish the minor. (5 ECTS)
- Teach the Teacher: Students need to submit weekly video assignments, one
  video per week. In these assignments, students must explain a subject from
  that week's curriculum. It's a "teach the teacher" assignment. This part needs
  to be passed (pass/fail). It is an optional route that students can take to earn 5
  ECTS.
- 3. **Growth Course:** The growth course that we are offering requires students to submit a reflection report along with their weekly assignments upon completion. This is an optional route that students can take to earn 5 ECTS.
- 4. Trading Journal: Students participate in a trading competition, keep a journal of their trading activities, analyses, trade execution and reflect upon it. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

**Optional:** Students may also replace one of the optional parts of this minor with one of the optional parts of the "Blockchain, AI & Quantum" minor. For more information about these options, please refer to the minor description of this minor and discuss with the teachers.

**Total Grade:** Students can fully complete the minor and receive their full points, or they can receive partial points for each completed part.

## Teaching methods + study load

#### Teaching method(s):

Blended learning, classical education, individual and team assignments, presentations, portfolio's and reports. Tokenized education.

#### Study load:

- Web colleges + tutorials + lectures guest speakers.
- Intensive contact with industry, i.e. advisory report.
- Application of blended learning where students prepare the material at home and come to class to discuss the material. In addition, the homework assignments for the portfolio are related to the teaching material.
- We strongly encourage ecosystem learning (on- and offline) via KOIOS.
- Minor is considered to be intensive but instructive by students.

An example student route has been calculated in the table below. This is the case for a student who follows the full Trading programme and doesn't chose to replace parts wit the other optional parts.

	Contact time	Weeks	Hours	Total hours	
	Lectures	8	12	96	
	Weekly test	6	0,5	3	
	Feedback	8	1	8	
	Selfstudy				
	Reading time	6	20	120

Subject themes Students can search for minors in OSIRIS student based on the following themes. (more than one Indicate within which category/ categories the minor falls by ticking one or more of possible) the following options: **Economics and Market** O People and Culture 0 Health and Sports O Law, Security and Society O ICT and Media O Technology and Design International themes O Work, Welfare and Education Management and **Organisation** Miscellaneous Main goal Minor (student): The student applies technical and fundamental characteristics of digital assets and relates this to socio-economic (macro & micro) behaviour. They will build up a comprehensive understanding of fundamental and technical analysis and the managing of digital assets and apply this theory in practice with field partners. In other words, the student can recognize opportunities and threats regarding the trading and managing of digital assets and can relate this to field practice, macro-economic tendencies, and psychology and behaviour. Main goal Minor (Finance & Control): We started this minor because we believe that trading and investing, and therefore this minor, can act as a gateway for students to investigate further (new & old) financial systems. **OSIRIS** code BFM-HMVT20-TRADE

#### Minor #HYF FinTech: Investing & Trading (FIT)

Description of	Description text (wherever the text says 'minor', it can also be read as elective module)
components Title & language	#HYF FinTech: Investing & Trading (FIT)
Туре	This minor will be taught in English, and students may submit assignments in Dutch if allowed by their main study program.  Minor (30 ECTS)
	· · · · ·
Faculty/ programme offering the minor	Program: Finance & Control Faculty: Business, Finance, Marketing (BFM)
Contact person	General Co-ordinators Minor:  Malva Ahmed (m.p.ahmed@hhs.nl) & Jamie Jansen (j.jansen@hhs.nl)
General Objectives	General objectives  The 21 <sup>st</sup> century asks for 21 <sup>st</sup> -century education. Here at THUAS, we encourage our students to not only leave university with a degree but also with 21 <sup>st</sup> -century skills. The use of financial technology, or 'FinTech', has increased significantly in recent years. What in the past was a complex way to manage finances is now used by millions of people worldwide thanks to the rise of online banking and mobile platforms. With the emergence of financial technology, students must be cognizant of the latest digital innovation to fully prepare for what may be referred to as the fourth industrial revolution. The existing financial landscape will fundamentally be altered by incorporating technology to finance, leading to more new entrants providing more effective and efficient financial solutions to its users. We want students to become world citizens, in our case familiar with the workings of global financial systems and their financial products (assets). Becoming a world citizen isn't easy. It means that, other than understanding the theory, you would also need to adjust your mindset and behavior, and for that, you also need insights and training. Part of this 'mindset and behavior' is developing critical thinking, fundamental and technical research skills and "global" orientation. Therefore this 30 ECT, as opposed to the 15 ECT variant (Trading Digital & Financial Assets (BFM-HMVT20-TRADE), also adds these additional elements in the mix. In this extended version, you will encounter real-life field challenges, research challenges, team & communication skills, personal development aspects, and even more in-depth technical analysis (TA) and fundamental analysis (FA) knowledge.  The art of doing  We therefore combine theory, practice and the "art of doing / experiencing" in this minor. We believe that real-life trading and managing of digital financial assets, backed by theory and backed by field experts, will act as a bridge towards understanding these types of assets. We expect this minor to act a

financial systems, like, for example our monetary systems. We aim to broaden the student's horizon, learning by doing and experiencing first-hand. The 30 ECT variant allows us to add more elements to the teaching philosophy: "Understanding the bike, by riding it". Resulting in finance professionals equipped with not only an understanding of but also experience in, managing financials assets and the global financial systems of the 21st century that we are all part of. Finally, as FinTech is becoming a more dominant phenomenon with practical solutions, the purpose is to merge theoretical knowledge with practical case studies for students to better comprehend both the threats and opportunities of this nascent industry.

#### Multidisciplinary approach

Other than the integration of field experts, other disciplines like sustainability, IT and Cyber security and (inter)national partners. The aim of this multidisciplinary approach is to create a multidisciplinary view of the world for our future finance professionals. There might be an overlaps with some of the topics from your regular curricula or other minors due to the multi-disciplinary approach, but thanks to that same approach a lot of new unfamiliar topics will introduce themselves as well, as well as different views / perspectives, field challenges and real life action in the realm of TA and FA trading and Investing.

#### **Topics of content**

- 1. A Technical Analysis of Digital Financial Assets: this is the mathematical approach of reading charts and graphs and base future prediction upon the past.
- 2. A Fundamental Analysis of Digital Financial Assets: here, we analyse underlying core elements of the asset. Using quantitative and qualitative analysis, also includes non-financial fundamental elements ("integrated reporting").
- 3. Global Systems: this is where we focus on the current global systems, like our monetary or exchanges systems, and upcoming new financial systems like decentralised exchanges or decentralised financial products (global inclusiveness).
- 4. SDG's: we will bridge finance and with the role it plays regarding the SDG's. We will teach students, and let them experience on their own, how they as future finance professionals can contribute themselves to the SDG's in a more sustainable and inclusive way, while managing financial assets.
- 5. Psychology and behaviour: this is where we confront students with their emotions, feelings and behaviour. A large part of our behaviour and choices are visible when acting under pressure (for example, when you trade and open a position). This is where we offer students insight and tools to better themselves and their skill set. We will also cover elements of personal development and growing mindset.
- 6. Understanding of recent financial technology developments. This section aims to illustrate students the latest updates and changes of the fast-moving fintech industry, including new innovations such as tokenised assets, national digital

currencies, GPDR focused solutions (Regtech), technology and management business innovation and digital entrepreneurship.

In this 30 ECT variant all the above is done in field practice setting where you will encounter and deal with real life trading situations, field challenges and research challenges from actual field partners. This time not only done on an individual basis, but also on a team base. The 30 ECT minors allows for more time and therefore does an in-depth analysis per topic of content. More subjects are discussed within each topic of content as well as further elaboration on each topic and inherent subjects.

#### Flexible and personal study elements

We will offer this course in a blended variant and use innovative educational tools to incentivize study behaviour. Examples are digital tokens and badges, but also high-level trading software. It will also be offered via the KOIOS open infrastructure, enabling a platform for students to connect with other enthusiasts worldwide and enabling flexible personal elements like learning at your own pace or choice in assignments. Students can also follow lectures and courses of the other minors.

#### Optional Learning programms/goals:

**Personal Growth and Life Skills:** Students should be able to use practical skills like mindfulness, deep learning, and effective communication in both personal and professional situations.

**Understainding Blockchain:** By the end of this minor, students should not only be able to explain the fundamental principles of blockchain technology.

#### Intro

#HackYourFuture - Are you ready to shape your future in finance?

Our Fintech Investing and Trading minor (FIT) is designed to equip you with the knowledge and skills you need to navigate the rapidly changing world of financial technology. We explore how the internet has enabled fintech, and the implications of these technologies on your life. You will learn how to create a robust investment thesis and a future-proof investment portfolio. You will gain knowledge in investing in technologies, protocols, and companies of the future and apply that knowledge through hands-on experience by participating in a trading competition. But we do more: we also equip you with both the personal development knowledge and skills needed to tap into your true potential. Enrol now and take the first step towards your future in fintech.

## Structure 15 & 30 ECT Minors

There are two variants of the Trading & Investing minor, 15 & 30 ECT. Both Minors start simultaneously, so 15 ECT and 30 ECT classes begin together. After ten weeks, the first period, students of the 15 ECT variant are finished. Students of the 30 ECT variant then continue with the second part for more profound knowledge, skills, and network. This second part is another ten weeks.

The 15 ECTS consists of three parts, each worth 5 ECTS, while the 30 ECTS comprises six parts, also valued at 5 ECTS each. The minor consists

of a main mandatory part worth 5 ECTS, along with two optional parts that students can select based on their interests and skills. The minor can be customized to suit the educational preferences of the student, including the option to swap parts with other minors. For further details, please refer to the 'Description of Tests and the Minimum Pass Rate'. The structure above is similar for the second block of the 30 ECTS.

### Summary of contents

#### **Topics of content (main overview)**

- 1. A Technical Analysis of Digital Financial Assets: this is the mathematical approach of reading charts and graphs and base future prediction upon the past.
- 30 ECT-extension: more variables, settings, platforms, products and services, analytics tools and trading skills and mindsets are added.
- 2. A Fundamental Analysis of Digital Financial Assets: here we analyse underlying core elements of the asset. Using quantitative and qualitative analysis, also includes non-financial fundamental elements ("integrated reporting").
- 30 ECT-extension: more systems, products and services from centralised institutions, in-depth analysis of more different markets are added.
- 3. Global Systems: this is where we focus on the current global systems, like our monetary or exchanges systems, and upcoming new financial systems like decentralised exchanges or decentralised financial products (global inclusiveness).
- 30 ECT-extension: more policies, global and local markets, decentralised alternatives and recent global innovations & developments are added.
- 4. SDG's: we will bridge finance and with the role it plays regarding the SDG's. We will teach students, and let them experience on their own, how they as future finance professionals can contribute themselves to the SDG's in a more sustainable and inclusive way, while managing financial assets.

30 ECT-extension: your field assignment and research assignments will be connected to the SDG-goals. This means that the real live field and research challenges are linked to an SDG.

- 5. Psychology and behaviour: We confront students with their emotions, feelings and behaviour. A large part of our behaviour and choices are visible when acting under pressure (for example, when you trade and open a position). This is where we offer students insight and tools to better themselves and their skill set.
- 30 ECT-extension: we will also cover personal development and growing mindset elements.

In this 30 ECT variant, all the above is done in field practice setting where you will encounter and deal with real-life trading situations, field challenges and research challenges from actual field partners. This time not only done on an individual basis, but also on a team base. The 30 ECT minors allow for more time and, therefore, do an in-depth analysis per content topic. More subjects are discussed within each topic of content, and further elaboration on each topic and inherent matters.

#### Target group

As a multidisciplinary topic, this course is open to all. Our experience has shown that students from diverse backgrounds enroll in this course. The minor starts from the basics and is fully adaptable and flexible to meet your educational needs.

## Entry requirements

Intermediate English proficiency is required. Assignments may be submitted in Dutch if your main program also allows it. Prior knowledge is not necessary; the minor welcomes students starting from scratch.

#### Final objectives/ competencies

Desired competencies. These competencies can be traced back to the program's professional (domain) competencies (s) offering the minor. Competencies are always on the university of applied sciences level. For a transfer minor, these competencies should be derived from the academic competency profiles.

- 1. Provide a contribution to the design of the management control system aimed at the management, control and monitoring of an organisation, such that the (strategic) goals are achieved.
- 2. Selecting and applying appropriate analysis methods aimed at taking the right decisions by an organisation.
- 3. Finance professionals can translate practical questions in organisations on the basis of a critical analysis into a concrete knowledge need and answer these with practical, feasible advice or designs (e.g. product, process, model), focusing on decision making that leads to improvement or renewal of practical situations .
- 4. Finance professionals are advisory. This means, among other things, that they are communicative in word / and writing, also in an international context. Finance professionals are agile because they can reflect on their own actions and their own learning process and can adjust their actions accordingly.

The above are the Finance & Control Program Learning Outcomes (PLO's) from which this minor is officially offered.

#### Goals:

LO1: The student is able to evaluate (15 ECT) and create (30 ECT) entry and exit trading points based on fundamental as well as technical aspects of trading

LO2: The students is able to apply trading skills into practice and will be able to actively manage a trading/investing portfolio (15 ECT) and participate in trading research field projects (30 ECT)

LO3: The student will learn the fundamentals of financial markets, macroeconomic tendencies, their history and their implications on the world economy (15 ECT) and evaluate them with global market tendencies (30 ECT)

LO4: The student will be able to analyse (15 ECT) and evaluate (30 ECT) the financial results of companies (listed on stock exchanges)

LO5: The student learns extensive risk and investment management strategies and apply them in a live trading competition for 10 weeks (15 ECT) or 20 weeks (30 ECT).

LO6: The student will learn to work in a team of traders, collectively and actively managing a portfolio and act as advisors to employers and/or trading/investment funds (15 ECT). Students can create a (automated) trading strategy based, based on this portfolio managing (30 ECT)

LO7: The student will learn how to recognise and improve Psychologic elements of trading (15 ECT) and how to apply them in TA and FA (30 ECT)

LO8: the student support and evaluates the pallet of possible TA variables, connects them with FA variables and applies them over an extended period in real live trading situations.

LO 9: the student supports and advices in real life field and research challenges.

# Description of tests and minimum pass rate

#### First block (first 15 ECTS)

- 1. Main Portfolio: In the lessons, weekly tests are administered, of which four out of five must be passed. Students must not have missed more than three lessons and must pass at least four tests. Additionally, students will actively manage a portfolio in which theoretical knowledge and practical skills are tested. This part must be completed with a pass (pass/fail). It is a mandatory requirement for every student of the minor to complete in order to finish the minor. (5 ECTS)
- Teach the Teacher: Students need to submit weekly video assignments, one video per week. In these assignments, students must explain a subject from that week's curriculum. It's a "teach the teacher" assignment. This part needs to be passed (pass/fail). It is an optional route that students can take to earn 5 ECTS.
- 3. **Growth Course:** The growth course that we are offering requires students to submit a reflection report along with their weekly assignments upon completion. This is an optional route that students can take to earn 5 ECTS.
- 4. **Trading Journal:** Students participate in a trading competition, keep a journal of their trading activities, analyses, trade execution and reflect upon

it. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

#### Second Block (Second 15 ECTS)

- 1. Main Portfolio: In the lessons, weekly tests are administered, of which four out of five must be passed. Students must not have missed more than three lessons and must pass at least four tests. Additionally, students will actively manage a portfolio in which theoretical knowledge and practical skills are tested. This part must be completed with a pass (pass/fail). It is a mandatory requirement for every student of the minor to complete in order to finish the minor. (5 ECTS)
- Teach the Teacher: Students need to submit weekly video assignments, one video per week. In these assignments, students must explain a subject from that week's curriculum. It's a "teach the teacher" assignment. This part needs to be passed (pass/fail). It is an optional route that students can take to earn 5 ECTS.
- 3. Growth Course: The growth course that we are offering requires students to submit a reflection report along with their weekly assignments upon completion. This part needs to be passed (pass/fail). This is an optional route that students can take to earn 5 ECTS. "Students who have already completed the growth course in the first block will enroll in the advanced program, while students who did not select it in the first block will be placed in the basic program.
- 4. **Field Assignment**: This assignment involves solving a real-life problem/assignment in a group format. The format of the output differs per assignment and assignment provider. Students must achieve a grade of 5.5 or above to pass this component. It is an optional route that students can take to earn 5 ECTS.

**Optional:** Students may also replace one of the optional parts of this minor with one of the optional parts of the "Blockchain, Al & Quantum" minor. For more information about these options, please refer to the minor description of this minor and discuss with the teachers.

**Total Grade:** Students can fully complete the minor and receive their full points, or they can receive partial points for each completed part.

## Teaching methods + study load

#### Teaching method(s):

Blended learning, classical education, individual and team assignments, presentations, portfolio's and reports. Tokenized education.

#### Study load:

- Web colleges + tutorials + lectures guest speakers.
- Intensive contact with industry, i.e. advisory report.
- Application of blended learning where students prepare the material at home and come to class to discuss the material. In addition, the homework assignments for the portfolio are related to the teaching material.

- We strongly encourage ecosystem learning (on- and offline) via KOIOS.
- Minor is considered to be intensive but instructive by students.

An example student route has been calculated in the table below. This is the case for a student who follows the full Trading programme and doesn't chose to replace parts wit the other optional parts.

Contact time	Weeks	Hours	Total hours
Lectures	16	12	192
Presentation	6	0,5	3
Feedback	16	1	16
Self-study			
Reading time	12	20	240
Watching time	12	10	120
Test preparation			44
Assignments			
Portfolio assignments	12	10	120
Trading Journal	3	16	48
Field assignment	6	8	48
Video assignment	6	0,5	3
Total in hours			834
Total in studypoints (ects)			30

## Contact hours per week

There are three contact moments of each 4 hours per week. Multiple guest lectures will be facilitated.

## Study and other aids

In addition to the Koios.world platform (see

https://app.koios.world/#/worlds), which supports online content sharing, community building and field /network connecting, other aids are coming from:

Full-time/ part- time and term	full-time minor, 2 semesters, starts at the official date of the academic year (beginning September) and halfway (mid-February)		
Subject themes (more than one possible)	Students can search for minors in OSIRIS student based on the following themes. Indicate within which category/ categories the minor falls by ticking one or more of the following options:		
	<ul> <li>Economics and Market</li> <li>Health and Sports</li> <li>ICT and Media</li> <li>International themes</li> <li>Management and Organisation</li> <li>People and Culture</li> <li>Law, Security and Society</li> <li>Technology and Design</li> <li>Work, Welfare and Education</li> </ul>		
Miscellaneous	Main goal Minor (student): The student applies technical and fundamental characteristics of digital assets and relate this to socio-economic (macro & micro) behaviour. They will build up a comprehensive understanding of fundamental and technical analysis and the managing of digital assets and apply this theory in practice with field partners. In other words, the student can recognise opportunities and threats regarding the trading and managing of digital assets and can relate this to field practice, macro-economic tendencies, and psychology and behaviour.  Main goal Minor (Finance & Control): We started this minor because we believe that trading and investing, and therefore this minor, can act as a gateway for students to investigate further (new & old) financial systems.		
OSIRIS code	BFM-HMVT21-FIT		

# **13. Module Descriptions Marketing Management**

Intercultural Ma	anagement (ICM)	
Credits	3	
Code	TBD	
Entry requirements	Basic knowledge of marketing.	
Semester	Semester 2 / term 3

Method	Weekly lectures and assignments
Lecturer(s)	Mr. Santalla, Mrs. Dammers
Learning outcomes	<ul> <li>Business English</li> <li>Job Application</li> <li>Employability</li> <li>Communication</li> <li>Negotiations Workplace</li> </ul>
Recommended or required reading/tools	A reader. Material will be posted in Blackboard/Brightspace
Assessment methods	Assignment: CV of LinkedIn profile Oral exam: job interview, video application of negotiation Timed online. Exam: Application letter of graph description Timed online assessment:
Level	Third year (for regular bachelor student)
Course content	This module is aimed at developing English language skills for employability and workplace contexts, in particular searching and applying for jobs and participating in (job) negotiations. The module offers functional language and phrases while drawing on various authentic workplace scenarios. You will study and practice the skills and language needed to craft an English LinkedIn Profile or CV, write an application letter targeted towards a particular vacancy, and write a graph data analysis. In terms of speaking skills, you will practice skills, expressions and vocabulary needed in job interviews and negotiations. Throughout the course, you'll be asked to share your opinions, ideas, questions, and best practices with other learners. The best way to get the most out of the course is to be prepared to join in and share your experiences.

Digital Marketing & Sales (Story telling)	
Credits	6
Code	(TBD)
Entry requirements	NA
Semester	Semester 2 / term 3 & 4
Method	Weekly lectures
Lecturer(s)	Mr. Hoppen, Mrs. Belt
Learning outcomes	The student  • Knows what creative writing is  • Knows the difference between business and creative writing  • Know what storytelling is  • Understands how storytelling can be used to get the marketing message across  • Investigates which elements a story can consist of  • Can apply these elements in a story  • Can draw up a brand foundation  • Can describe a target group  • Write a brand or corporate story
Recommended or required reading/tools	A reader. Material will be posted in Blackboard/Brightspace
Assessment methods	self-study, digital lessons, writing assignments, giving and receiving peer feedback, teacher feedback
Level	Third year (for regular bachelor student)
Course content	Students work individually and in groups to discover the elements of creative writing, both passively through reading texts and watching videos and actively through writing assignments and the final assignment. They make the link with marketing by using the story as a strategic marketing tool.

Social Value Cr	eation
Credits	3
Code	CE-S306-22
Entry requirements	NA
Semester	Semester 2 / term 4
Method	<ul> <li>Workshops</li> <li>Group work</li> <li>In-class discussions</li> <li>Videos</li> <li>Self-study</li> </ul>
Lecturer(s)	Luc Beurskens, Tiffany Dammers, Arno van Dijk, Angela Groeneveld, Tim Hoppen, Sandra de Koning, Frans Lodders and Araceli Marti-Fernandez
Learning outcomes	<ul> <li>World citizenship</li> <li>Value creation</li> <li>Creativity</li> <li>Personal Leadership</li> </ul>
Recommended or required reading/tools	All course material will be available on Blackboard/Brightspace
Assessment methods	<ul> <li>Weekly vlogs</li> <li>Weekly discussion with lecturers</li> <li>Project completed before deadline</li> <li>Documentary</li> <li>Participation evaluation and event</li> </ul>
Level	Third year (for regular bachelor student)
Course content	Analysis of various aspects of national culture using cultural frameworks and models in order to gain better insight into intercultural management and marketing. Students should also gain insight into cultural programming and the influence this has when you work in intercultural teams or do business across cultures.  This course revolves around creating social value. Students will work on a project to create social value in groups of six. They will be given total freedom in choice and execution of that project. The students will participate in a Design Thinking workshop during this course's kick-off. During the project, the groups will be coached by a duo of lecturers. The progress of each group's project is tracked by vlogs that the students hand in weekly and discussion with the lecturers. During the last week of the course, the students will evaluate their own input and that of their teammates, how it was to work in the team and the development of the CE skills.  The course will end with an event during which all the documentaries of all the projects will be shown and the different awards will be presented.

City Marketing	
Credits	3
Code	CE-KVCMI-15
Entry requirements	Basic knowledge of Marketing
Semester	Semester 2 / term 3
Method	Assignments
Lecturer(s)	Mrs. Barkmeijer
Learning outcomes	Students, working in a project team, will develop a strategic city marketing plan for a village, city or region. You will have to visit this city during the course program. Next to the plan itself, your knowledge will be reviewed in an exam.
Recommended or required reading/tools	Assignments will be published in Brightspace
Assessment methods	Assignment and an exam
Level	Third year (for regular bachelor student)
Course content	Within one hour, people from the Netherlands can reach London, where they can shop all day, spend their time on a cultural trip, play the tourist and in the evening they are back home.  Taking the train to Paris costs only 20 euro's in January and February (special price). And nowadays a lot of students own their own car. So taking a last minute weekend trip to Belgium or enjoying a night out in Groningen is not unthinkable. That means they have spent th eir money someplace else, which is good for the local economy of that village, city or region.  City marketing is about making the right choices and develop a distinctive brand. It is more difficult however, than positioning a new product line for Unilever, as more parties are involved with the choices that a city marketer makes. And residents, visitors, businesses and local investors are all target markets, that cannot be excluded. For all those target markets to get involved it is important to map the city's identity, this will be the basis for city branding. An increasing number of cities are working on a city marketing strategy. A problem however, is that they find it hard to make a clear choice in their positioning. City marketeers can deliver a substantial contribution in the development of effective city marketing strategies. And hopefully, they can prevent a city from making the wrong choices in their slogans: "Livonia, some bigger, none better", "Walla Walla, a city so nice, they named it twice", "Gent, so much city", "Paris, est a vous (Paris is yours)", "Karlsruhe, viel vor, viel dahinter (much before, much behind)",  Students, working in a project team, will develop a strategic city marketing plan for a village, city or region. You will have to visit this city during the course program. Next to the plan itself, your knowledge will be reviewed in an exam.

#### **CE Electives**

<u>Students are asked to choose 1 out of the 2 electives mentioned below</u>. For the electives we reserved 5 spots of exchange student. The other students attending will be regular Dutch students. Once an elective is full the students will be asked to select a different one.

Elective Inclusi	ve Entrepreneurship
Credits	3
Code	CE-KVIE-15
Entry requirements	NA
Semester	Semester 2 / term 4
Method	Assignments and a field trip to Romania (TBD)
Lecturer(s)	Mr. La'Met
Learning outcomes	Developing a group report covering two assignments: Assignment one: What are the impact and effectiveness of the European Union policies on global citizenship in connection with the above topics and inclusive entrepreneurship? The main learning outcomes of assignment one is an understanding and insight into EU entrepreneurship and initiatives.  Assignment two: Looking specifically at Romania and The Netherlands, what advice would you give to their respective governments to improve youth inclusive entrepreneurship and global citizenship as part of the goals of an
Recommended or	European initiative and global citizenship?
required reading/tools	Assignments will be published in Blackboard.
Assessment methods	Developing a group report covering two assignments.
Level	Third year (for regular bachelor student)
Course content	Inclusive entrepreneurship is about a set of attitudes, competences and skills which allow people to turn their dreams into concrete projects or enterprises and then see these through to fruition. It is about more than starting an individual business. Inclusive entrepreneurship can be applied to self-employment, starting or growing micro or small enterprises and to social enterprises using business-based approaches driven by a social mission. Indeed, the personal qualities required for entrepreneurship are essential for success in the knowledge economy – whether this is in the private or public sectors.  Global citizenship has evolved as historically human beings always have organized themselves into groups and communities based on shared identity. Such identity gets forged in response to a variety of human needs - economic, political, religious, and social.  As a result, inclusive entrepreneurship plays an important role in the natural development of global citizenship and its importance to us all.  In this course you will learn and understand what are the impact and effectiveness of the European Union policies on global citizenship in connection with above topics and inclusive entrepreneurship. Students, working in a project team, will develop a report covering two assignments, self-assessment and a final presentation.

Elective Neuro-	Marketing & Psychology of advertising
Credits	3
Code	CE-VKNMP-19
Entry requirements	NA
Semester	Semester 2 / term 4
Method	Lectures and assignments
Lecturer(s)	Mrs. Barkmeijer, Mrs. Bruinsma
Learning outcomes	The student demonstrates understanding of the neuro-marketing theory and principles. (Bloom 3)  The student analyses how this knowledge and knowledge of how the brain functions is used in advertisements. (Bloom 4)  The student develops the perfect advertisement. (Bloom 7)  In this module you will  - Learn to be able to explain how neuromarketing is used in the advertising sector.  - Learn to understand how (part of) the brain functions and apply them to advertising techniques.  - Perform desk research on cultural differences with regard to brain functioning, draw conclusions from the information found.  - Determining which trends and developments are important in the field of neuromarketing and build an ethical point of view on the subject.  - Can translate a trademark direction to the branding model and demonstrate this for the chosen city or region  - Professional craftsmanship: Student collaborates interdisciplinarily, informs each other about findings, discusses directions to choose, in English.
Recommended or required reading/tools	Weekly assignments will be published in Blackboard.
Assessment methods	4 portfolio assignments
Level	Third year (for regular bachelor student)
Course content	Neuro marketing is becoming a hot topic in the advertising world. Neuromarketeers make use of the insights from neuroscience or more simply ask "how does the brain work?"  To give you some insights beforehand:  Yes, even you with all your marketing knowledge can be influenced by advertising!  The brains of men and women sometimes work and react differently. Now we know for sure!  The ultimate knowledge of the buying behaviour of the consumer lies in the functioning of the brain, emotions and motivations. When you know how the brain and body reacts, you know better how to approach the consumer in order to best stimulate his buying behaviour. This knowledge can be obtained in different ways:

- from primal sources: body language, eye gaze and facial expression
- from medical sources: EEGs and functional MRI scanners from neurology
- from data sources: the endless stream of big data of human behaviour in response to specific impulses

In this course we will discuss the first two sources. Next to that, we will also discuss the ethical side of neuro marketing developments.

This is a very active module where you will work on a duo portfolio.
