

Selection of visual material on the web

Many digital learning materials are also offered on the web:

- [Academic Earth](#) contains thousands of lectures from the world's top scholars.
- [Alison](#) is a free online education platform that mostly focuses on workplace-based skills. Alison's students have access to online courses, specializations, and degrees in a variety of subjects published by many big name universities and organizations.
- At [Big Think](#) you can watch videos from experts in a wide range of disciplines, from health to leadership and neuroscience.
- [CosmoLearning](#) is an educational website with [online colleges](#) and [documentaries](#).
- [DWDD University](#) is an inquisitive branch of De Wereld Draait Door, which will be opened at irregular times to better understand the wonderful, spinning world.
- [EUscreen](#) contains television material from audiovisual archives from all over Europe.
- [Fastfacts](#) offers short videos about current developments in science. Because everything is published under the Creative Commons license, the videos can be shared with third parties without any problems.
- In [Free Documentaries](#) you will find documentaries such as: Supersize me or Bowling for Columbine. These are available for free.
- [The Futures Channel](#) is a producer and publisher of documentaries about careers and applications in science, technology, engineering and mathematics.
- [Khan Academy](#) is a 'not-for-profit' organization that offers educational videos for free (does not work under Internet Explorer).
- [Moving Image Archive](#) contains digital films uploaded by users that range from classic feature films, daily alternative news broadcasts, cartoons and concerts. Many of these videos are available as a free download.
- The [online lectures](#) of [Onlinecourses.com](#) cover a wide range of topics and have all been selected and carefully designed by experienced instructors around the world.
- [Planet SciCast](#) contains a large collection of scientific short videos, submitted by children, teachers, students and professionals.
- Qwiki is an encyclopedia about a variety of (scientific) topics aimed at an audio-visual presentation of the information.
- Sciencedump contains a collection of all kinds of short videos about science.
- Via [NPO Start](#), the public broadcasters in the Netherlands together offer their recent TV broadcasts so that you can watch them 'on demand'.
- [Teacher tube](#) is a community where teachers can share instructional videos.
- [Videlectures.net](#) contains video lectures presented by scholars and scientists at events such as conferences, summer schools, workshops and science promotion events covering all areas of science.
- [The World Lecture Project](#) includes a large number of audio and video lectures by scientists from all over the world.

Non-exhaustive overview of universities that offer public video material (mainly lectures):

- [Universiteit van Amsterdam](#)
- [TU Delft WebColleges](#) and [TU Delft OpenCourseWare](#)
- [Harvard University](#)
- Massachusetts Institute of Technology: [MIT Video](#) and [MIT OpenCourseWare](#)
- [Yale University](#)
- [University of Cambridge](#)
- [University of Oxford](#)
